COMPARISON OF THE THREE MONTHS ENDED FEBRUARY 29, 2004 TO THE THREE MONTHS ENDED FEBRUARY 28, 2003.

REVENUES - Revenues for each of the three months ended February 28, 2003 and February 29, 2004 totaled \$8.3 million. The Company is currently completing significant tooling programs for both the Mercedes-Benz M Class sports utility vehicle and the new "crossover" vehicle. The Company's customer for these vehicles is the Tier 1 supplier to Mercedes-Benz for these particular vehicles. For a portion of these tooling systems the Company is performing engineering services and manages certain die manufacturing subcontracted by the Company, for which the Company is responsible for the engineering and performance of these tools.

The Company's backlog of awarded contracts, which are all believed to be firm, was approximately \$16.6 million and \$32.7 million as of February 29, 2004 and February 28, 2003, respectively. The Company expects all backlog contracts will be reflected in sales during fiscal years ending August 31, 2004 and 2005. Despite the backlog, the Company continues to see a general "softness" in the overall domestic automotive tooling industry. The Company believes that such should improve in the latter part of 2004 as a result of the domestic automakers apparent commitment to increasing future new model restyling. In addition, the Company is and has quoted on contracts in which the timing of the release of such contracts is not established.

COST OF SALES -- Total cost of goods sold were \$7.5 million for the second quarter of fiscal 2004 and \$7.4 million for fiscal 2003, and as a percent of

Edgar Filing: RIVIERA TOOL CO - Form 10-Q

sales increased slightly from 89.5% for 2003 to 89.9% for 2004. Direct costs (materials and labor) decreased by \$163,000, from \$5.1 million for 2003 to \$5.0 million for 2004. Engineering expense increased by \$111,000 from \$584,000 for 2003 to \$695,000 for 2004. Lastly, of the cost of goods sold, manufacturing overhead increased by \$70,000 from \$1.7 million for 2003 to \$1.8 million for 2004. Additional details of these changes in cost of sales for the second quarters of fiscal 2003 and 2004 are as follows:

- Direct materials expense was \$1.6 million for both second quarters of 2003 and 2004. Outside services expense decreased from \$2.1 million for 2003 to \$1.7 million for 2004 and as a percent of sales from 25.5% to 20.2%. This decrease was largely due to the Company incurring \$1.2 million less in expense related to its outsourced revenue in the second quarter of 2004. The balance of the outside services expense increased from \$1.0 million to \$1.8 million as a result of the Company outsourcing certain manufacturing processes. This outsourcing is a result of the Company attempting to meet customer delivery dates while incorporating significant numbers of customer engineering changes. These outsourced services largely consist of machining and laser cutting services.
- Direct labor expense increased from \$1.4 million for 2003 to \$1.7 million for 2004 and as a percent of sales increased from 17.2% to 20.4%. This change was a result of the Company incurring a 13% increase in direct labor hours, from 75,000 hours in 2003 to 85,000 in 2004. Of the total direct labor expense, regular or straight time increased by \$150,000 and as a percent of sales increased from 10.9% for 2003 to 12.7% for 2004. Overtime expense increased from \$525,000 for 2003 to \$639,000 for 2004, as a percent of sales, increasing from 6.3% for 2003 to 7.7% for 2004 as a result of the Company increasing overtime hours while attempting to meet customer delivery dates while incorporating a high number of customer engineering changes to the tooling.
- Engineering expense increased from \$584,000, 7.0% of sales, for 2003 to \$695,000, 8.4% of sales, for 2004. This increase was due to the Company's level of engineering personnel staffing required to fulfill the design and project management portions of contracts.
- Manufacturing overhead was \$1.7 million or 20.5% of sales for 2003 as compared to \$1.8 million or 21.3% of sales for 2004. During 2004, increases in manufacturing overhead were largely due to increases in medical insurance premiums, increases in machinery repairs and maintenance supplies, and increases in payroll tax expense.

9

SELLING AND ADMINISTRATIVE EXPENSE - Selling and administrative expense increased from \$417,000 for the second quarter of 2003 to \$506,000 for 2004. As a percent of sales, selling and administrative expense increased from 5.0% for 2003 to 6.1% for 2004. The largest selling and administrative expense increases were in salaries and wages and public company costs.

INTEREST EXPENSE - Interest expense decreased from \$221,000 for 2003 to \$123,000 for 2004. This decrease was largely due to the lower levels of debt during the comparative periods.

COMPARISON OF THE SIX MONTHS ENDED FEBRUARY 29, 2004 TO THE SIX MONTHS ENDED FEBRUARY 28, 2003.

REVENUES -- Revenues for the six months ended February 29, 2004 totaled \$16.6

Edgar Filing: RIVIERA TOOL CO - Form 10-Q

million as compared to \$12.6 million for the six months ended February 28, 2003, an increase of 31%. The Company is currently completing significant tooling programs for the both the Mercedes-Benz M Class sports utility vehicle and the new "crossover" vehicle. The Company's customer for these vehicles is the Tier 1 supplier to Mercedes-Benz for these particular vehicles. For a portion of these tooling systems the Company is performing engineering services and manages certain die manufacturing subcontracted by the Company, for which the Company is responsible for the engineering and performance of these tools. For the six months ended February 29, 2004, the Company had incurred approximately 161,000 shop floor hours as compared to 130,000 during the same period of 2003, an increase of 31,000 hours or 24%.

COST OF SALES -- Cost of goods sold increased from \$11.5 million for the six months ended February 28, 2003 to \$14.9 million for the six months ended February 29, 2004, however as a percent of sales decreased slightly from 90.8% for 2003 to 89.8% for 2004. Direct costs (materials and labor) increased by \$2.9 million, from \$7.1 million for 2003 to \$10.1 million for 2004. Engineering expense increased by \$300,000 from \$1.1 million for 2003 to \$1.4 million for 2004. Lastly, of the cost of goods sold, manufacturing overhead increased by \$200,000 from \$3.3 million for 2003 to \$3.5 million for 2004. Additional details of these changes in cost of sales for the six months ended February 28, 2003 and February 29, 2004 are as follows:

- Direct materials expense increased from \$2.2 million to \$2.7 million for the first two quarters of 2003 and 2004, respectively. Outside services expense increased from \$2.5 million for 2003 to \$4.1 million for 2004 and as a percent of sales from 19.7% to 24.6%. This increase was largely due to the Company outsourcing certain manufacturing processes in an attempt to meet customer delivery dates while incorporating a high number of customer engineering changes to the tooling. These services largely consist of machining and laser cutting services (a \$1.0 million increase).
- Direct labor expense increased from \$2.4 million for 2003 to \$3.3 million for 2004 and as a percent of sales increased from 19.3% to 19.7%. This change was a result of the Company incurring a 24% increase in direct labor hours, from 130,000 hours in 2003 to 161,000 in 2004. Of the total direct labor expense, regular or straight time increased by \$470,000 and as a percent of sales decreased from 13.0% for 2003 to 12.7% for 2004. Overtime expense increased from \$803,000 for 2003 to \$1,154,000 for 2004, as a percent of sales, increasing from 6.4% for 2003 to 6.9% for 2004 as a result of the Company attempting to meet customer delivery dates while incorporating a high number of customer engineering changes to the tooling.
- Engineering expense increased from \$1.1 million, 8.4% of sales, for 2003 to \$1.4 million, 8.2% of sales, for 2004. This increase was due to the Company's level of engineering personnel staffing required to fulfill the design and project management portions of contracts.
- Manufacturing overhead was \$3.3 million or 26.0% of sales for 2003 as compared to \$3.5 million or 21.0% of sales for 2004. During 2004, increases in manufacturing overhead were largely due to increases in medical insurance premiums and increases in payroll tax expense.

SELLING AND ADMINISTRATIVE EXPENSE - Selling and administrative expense increased from \$739,000 for the first two quarters of 2003 to \$909,000 for 2004. As a percent of sales, selling and administrative expense decreased from 5.8% for 2003 to 5.5% for 2004. The largest selling and administrative expense

Edgar Filing: RIVIERA TOOL CO - Form 10-Q

increases were in salaries and wages, public company costs and State of Michigan Single Business Tax expense.

INTEREST EXPENSE - Interest expense decreased from \$382,000 for 2003 to \$331,000 for 2004. This decrease was largely due to the lower levels of debt during the comparative periods.

FEDERAL INCOME TAXES

For the three and six months ended February 29, 2004, the Company recorded a reduction in the valuation allowance of approximately \$72,000 and \$153,000, respectively, to offset the income tax expense.

LIQUIDITY AND CAPITAL RESOURCES

During the six months ended February 29, 2004, the Company's cash provided by operating activities was \$4.4 million. This largely resulted from a decrease of \$2.1 million in receivables and a \$719,000 decrease in contracts in process. From investing activities, the Company incurred an increase in other assets (cash surrender value of life insurance policies) of \$22,000 and \$291,000 in additions to property, plant and equipment. The Company used \$3.8 million to reduce the revolving line of credit and \$283,000 to reduce long-term debt.

The Company believes that the unused portion of the revolving bank working capital credit line, receipt of progress payments from the Company's major customer, equity raised subsequent to the quarter end and the funds generated from operations will be sufficient to cover anticipated cash needs through fiscal 2004. However, depending on the level of future sales, and the terms of such sales, an expanded credit line or other financial instruments may be necessary to finance increases in trade accounts receivable and contracts in process. The Company believes it will be able to obtain such expanded credit line and/or other financing, if required.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

None.

ITEM 4. CONTROLS AND PROCEDURES

Within the 90-day period prior to the filing of this Quarterly Report on Form 10-Q, an evaluation was carried out under the supervision and with the participation of the Company's management, including the Chief Executive Officer (the "CEO") and Chief Financial Officer ("CFO"), of the effectiveness and design of disclosure controls and procedures used to prepare consolidated financial statements. Based on that evaluation, the CEO and CFO have concluded the disclosure controls and procedures designed to ensure that information required to be disclosed by the Company in reports filed or to be filed with the SEC are adequate and are operating in an effective manner. While the CEO and CFO believe that the Company's existing disclosure controls and procedures have been effective to accomplish its objectives, the CEO and CFO intend to examine, refine and formalize our disclosure controls and procedures and monitor ongoing developments.

There were no significant changes in our internal controls or in other factors that could significantly affect these controls subsequent to the date of the most recent evaluation.

Notwithstanding the foregoing, there can be no assurance that the Company's disclosure controls and procedures will detect or uncover all failures of persons within the Company and its consolidated subsidiaries to disclose material information otherwise required to be set forth in the Company's periodic reports.
