# TABLE OF CONTENTS

<u>Item 2.02 Results of Operations and Financial Condition</u> <u>Item 9.01. Financial Statements and Exhibits</u>

#### Item 2.02 Results of Operations and Financial Condition

On October 26, 2005, Kennametal Inc. (the Company) issued a press release announcing financial results for its first quarter ended September 30, 2005.

The press release contains adjusted return on invested capital, which is a non-GAAP financial measure and is defined below.

Management believes that investors should have available the same information that management uses to assess operating performance, determine compensation and assess the capital structure of the Company. This non-GAAP measure should not be considered in isolation or as a substitute for its most comparable GAAP measure. Non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies.

#### **Adjusted Return on Invested Capital**

Adjusted Return on Invested Capital is a non-GAAP financial measure and is defined as the previous 12 months net income, adjusted for interest expense and special items, divided by the sum of the previous 12 months average balances of debt, securitized accounts receivable, minority interest and shareowners equity. Management believes that this financial measure provides additional insight into the underlying capital structuring and performance of the Company. Management utilizes this non-GAAP measure in determining compensation and assessing the operations of the Company.

A copy of the Company s earnings announcement is furnished under Exhibit 99.1 attached hereto. Reconciliations of the above non-GAAP financial measures are included in the earnings announcement.

Additionally, during our quarterly teleconference we may use various non-GAAP financial measures to describe the underlying operating results. Management believes that investors should have available the same information that management uses to assess operating performance, determine compensation and assess the capital structure of the Company. These non-GAAP measures should not be considered in isolation or as a substitute for the most comparable GAAP measures. Non-GAAP financial measures utilized by the Company may not be comparable to non-GAAP financial measures used by other companies. Accordingly, we have compiled below certain reconciliations as required by Regulation G.

#### **EBIT**

EBIT is an acronym for Earnings Before Interest and Taxes and is not a calculation in accordance with GAAP. The most directly comparable GAAP measure is net income. However, we believe that EBIT is widely used as a measure of operating performance and we believe EBIT to be an important indicator of the Company s operational strength and performance. Nevertheless, the measure should not be considered in isolation or as a substitute for operating income, cash flows from operating activities or any other measure for determining liquidity that is calculated in accordance with GAAP. Additionally, Kennametal will adjust EBIT for restructuring charges, interest income and other items. Management uses this information in reviewing operating performance and in the determination of compensation.

#### **Adjusted Sales**

Kennametal adjusts current period sales as reported under GAAP for specific items including foreign currency translation. Management believes that adjusting the current period sales as reported under GAAP yields a more consistent comparison of year over year results and provides additional insight into the underlying operations. Management uses this information in reviewing operating performance and in the determination of compensation.

# **Normalized Earnings Per Share**

Normalized Earnings Per Share is a non-GAAP financial measure and is defined as earnings per share, adjusted for the current year s anticipated effective tax rate. Management believes that this financial measure provides a more representative comparison of the Company s financial performance period to period.
