UNITED DEFENSE INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2004

1. Basis of Presentation

The financial information presented as of any date other than December 31 has been prepared from the books and records without audit. Financial information as of December 31, 2003 presented in this quarterly report has been derived from the audited financial statements of United Defense Industries, Inc., but does not include all the associated disclosures required by generally accepted accounting principles. In the opinion of management, the accompanying unaudited interim financial statements contain all adjustments (consisting of normal, recurring adjustments) necessary to present fairly our financial position as of June 30, 2004 and the results of operations for the three months and six months ended June 30, 2004 and cash flows for the six months ended June 30, 2004. The results of operations are not necessarily indicative of the results that may be expected for the year ending December 31, 2004. These unaudited consolidated financial statements should be read in conjunction with the financial statements and the notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2003 and our Quarterly Report on Form 10-Q for the quarter ended March 31, 2004.

2. Summary of Significant Accounting Principles

Revenue and Profit Recognition for Contracts-in-Progress

We use different techniques for estimating and recording revenues depending on the type and characteristics of the contract. Sales are recognized on most fixed-price production contracts when the risks and rewards of ownership have been transferred to the customer. For our DoD production contracts, those criteria are typically met when the manufacture of the product is completed and the customer has certified it as meeting the contract specifications and as having passed quality control tests. For our foreign production contracts, sales are generally recorded upon shipment of products to the customer, which corresponds to when the risks and rewards of ownership transfer. Gross margin on each unit delivered or accepted is recognized, based on an estimate of the margin that will be realized over the life of the related contract. We evaluate estimates of gross margin on production contracts and recognize changes in estimates of gross margins during the period in which those changes are determined. Sales under fixed-price ship repair and maintenance contracts are recognized as work is performed. Under this method, contract costs are expensed as incurred and sales are recognized simultaneously based on the ratio of direct labor inputs and other costs incurred to date compared to estimated total direct labor inputs and total costs. Sales under cost reimbursement contracts for research, engineering, prototypes, ship repair and maintenance and certain other contracts are recorded as costs are incurred and include estimated fees in the proportion that costs incurred to date bear to total estimated costs. Award fees are recorded as revenue when the award is earned. We charge any anticipated losses on a contract to operations as soon as those losses are determined.

Stock-Based Compensation

At June 30, 2004, we had a stock-based employee compensation plan, which is described more fully in our Form 10K for the year ended December 31, 2003. On April 13, 2004 our stockholders approved an amendment and restatement of our stock-based plan, renamed the Incentive Award Plan, in order to (i) reserve an additional 2,000,000 shares for use under the plan, (ii) qualify the plan for certain awards pertaining to Sec. 162(m) of the Internal Revenue Code, and (iii) add the ability to make grants of other equity-based compensation. We account for the plan under the recognition and measurement principles of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations. Accordingly, we record compensation expense over the vesting period in our consolidated statements of operations if the option price is less than fair value of the common stock at the date an option is granted. On January 20, 2004, the Board of Directors authorized issuance of 141,000 shares of restricted stock and new stock options to purchase 500,000 common shares at an exercise price of \$31.80. The compensation recorded in the financial

UNITED DEFENSE INDUSTRIES, INC.

statements reflects the amortization based on vesting of stock options and restricted stock. The following table illustrates the effect on net income and earnings per share if we had elected to apply the fair value recognition provisions of FASB Statement No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation.

Stock Repurchase

In April 2004, the Board of Directors authorized the repurchase of up to \$100 million of our common stock. During the second quarter of 2004 we repurchased 868,800 shares at an aggregate cost of \$29.2 million.

New Accounting Pronouncements

On January 17, 2003 the FASB issued FASB Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities. FIN 46 becomes effective in the first quarter of 2004 and requires a variable interest entity to be consolidated by a company if that company is subject to a majority of the risk of loss from the variable interest entity's activities or entitled to receive a majority of the entity's residual returns or both. In general, a variable interest entity is a corporation, partnership, trust, or any other legal structure used for business purposes that either (a) does not have equity investors with voting rights, or (b) has equity investors that do not provide sufficient financial resources for the entity to support its activities. The adoption of the Interpretation had no significant impact on our financial statements.

In December 2003, the FASB issued SFAS No. 132R, Employers' Disclosure about Pensions and Other Postretirement Benefits. SFAS No. 132R requires additional disclosures about defined benefit pension plans and other post retirement benefit plans. The standard requires, among other things, additional disclosures about the assets held in employer sponsored pension plans, disclosures relating to plan asset investment policy and practices, disclosure of expected contributions to be made to the plans and expected benefit payments to be made by the plans. Annual disclosures applicable to our U.S. pension and post retirement plans were required to be made in our financial statements for the year ended December 31, 2003. Annual disclosures relating to our non-U.S. plans will be required for the year ending December 31, 2004. We

UNITED DEFENSE INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

have adopted this pronouncement as of December 31, 2003 for all of our U.S. plans. Disclosure of estimated future benefit payments is effective for fiscal years ending after June 15, 2004.

3. Investments in Affiliated Companies

Our investment in our 51% owned foreign joint venture in Turkey, FNSS Savunma Sistemleri A.S. (FNSS), is accounted for using the equity method because we do not control it due to our partner's veto rights over certain decisions, although we do have the ability to exercise influence over its operating and financial policies. Our share of the earnings from our investment in Turkey was \$6.1 million and \$0.6 million for the three months ended June 30, 2003 and 2004, and \$11.7 million and \$6.4 million for the six months ended June 30, 2003 and 2004. Our reported earnings from FNSS potentially could have been \$5.3 million higher. However, a dividend payment from FNSS in 2005 is unlikely and since FNSS does not have a contract for production beyond 2004, its ability to pay dividends in future years is unclear. Consequently this deterioration in the outlook for recoverability of our investment in FNSS is viewed as other than temporary. Limiting our FNSS-derived income to the level recorded to date results in eliminating our investment balance in FNSS.

The following table reports financial results from our joint venture in Turkey (FNSS).

	Three Months Ended June 30,		Six Months Ended June 30,	
	2003	2004	2003	2004
	(In thousands)			
Sales	\$77,879	\$62,081	\$119,732	\$113,688
Cost of sales	36,910	29,274	57,290	53,509
Net income	11,082	11,725	20,340	23,130

4. Comprehensive Income

Comprehensive income was \$74.5 million and \$83.9 million for the six-month periods ended June 30, 2003 and 2004, respectively. Comprehensive income consists primarily of net income, net foreign currency translation adjustments and fair value adjustments of foreign currency and interest rate hedges, net of taxes.

5. Long-Term Debt

In August 2001, we entered into a credit facility with various banks that included \$600 million of term loan facilities and a \$200 million revolving credit facility. In July 2002 we amended the credit facility to borrow an additional \$300 million for the purchase of United States Marine Repair, Inc. (USMR). We incurred \$5.5 million in additional financing fees that have been deferred and amortized over the remaining term of the credit facility using the effective interest method.

Outstanding borrowings on the term loan facilities were \$547 million at June 30, 2004. The facilities bear interest at variable rates with a weighted average rate of 3.42% at June 30, 2004. These loans are due through 2009 and provide for quarterly principal and interest payments. Principal payments of \$29.6 million were made during the first half of 2004.

6. Pension and Other Post Retirement Benefits

Edgar Filing: UNITED DEFENSE INDUSTRIES INC - Form 10-Q

At December 31, 2003, we revised the discount rate assumption used in the determination of net pension and post retirement costs and benefit obligations from 6.5% to 6.0%. On January 1, 2004 the rate of return assumption used for the actuarial estimates of these benefit programs was unchanged at 8.5%.

7. Commitments and Contingencies*Termination Claims*

In 1994 the Crusader program was initiated to develop for the U.S. Army an integrated and extensively automated two-vehicle artillery system consisting of a 155mm, self-propelled howitzer and a resupply vehicle. During the lifetime of the program, we were the sole-source prime contractor for its design and development. The Army's plan called for fielding of 480 Crusader systems, but in May 2002 the Secretary of Defense announced the termination of the program. The Army gave us formal notice of termination on August 7, 2002, and we subsequently received Army funding to accomplish an orderly closeout of Crusader activities and transition key Crusader technologies to the Future Combat Systems (FCS) Non Line of Sight-Cannon (NLOS-C) program. The Crusader termination resulted in a reduction to our workforce of approximately 180 employees. Through the period ended June 30, 2004, we incurred and invoiced the U.S. Government for \$39.2 million of termination costs, of which \$36.2 million has been recovered from the U.S. Government. In order to complete the Crusader termination process, we are negotiating a final termination settlement with the Army which we expect to conclude in due course.

Legal Proceedings

As a government contractor, we are subject to the audit, review, and investigative authority of various U.S. Government agencies. Depending upon the particular jurisdictional statute, violations of federal procurement rules may result in contract price reductions or refunds, civil penalties, and/or criminal penalties. Government contractors that violate the False Claims Act and/or other applicable laws may be suspended or debarred from receiving further government contracts. Given our dependence on U.S. Government contracts, suspension or debarment is an inherent risk that could readily have a material adverse effect on us. Our policy is to cooperate with governmental investigations and inquiries regarding compliance matters, and we also make voluntary disclosures of compliance issues to governmental agencies as appropriate. In the ordinary course of business, we provide information on compliance matters to various government agencies, and we expect to continue to do so in the future. For example, as previously disclosed, in 2002 we were served with a grand jury subpoena issued by the United States District Court for the Eastern District of Virginia, seeking information regarding a 2000 contract between us and the Italian government for the upgrading of amphibious assault vehicles. We believe that the grand jury investigation seeks to ascertain whether any violation of the Foreign Corrupt Practices Act occurred in connection with the Italian contract. While we are not aware of any such violation, and we are cooperating with the investigation, it is too early for us to determine whether the ultimate outcome of the investigation would have a material adverse impact on our results of operations or financial position.

UNITED DEFENSE INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

From time to time we are involved in legal proceedings arising in the ordinary course of our business. We believe that we have adequately reserved for these liabilities and that there is no litigation pending that we expect to have a material adverse effect on our results of operations or financial condition.

Environmental Matters

We incur costs annually to comply with environmental laws. Operating and maintenance costs associated with environmental compliance and prevention of pollution at our facilities are a normal, recurring part of operations, are not significant relative to total operating costs or cash flows, and are generally allowable as contract costs under our contracts with the U.S. Government (Allowable Costs).

As with compliance costs, a significant portion of our expenditures for remediation of existing contamination at our facilities consist of Allowable Costs. However, as of June 30, 2004, we had accrued approximately \$33 million to cover any investigation and/or remediation costs that may not be Allowable Costs. The amount accrued is based on reasonable estimates, although there is a possibility that amounts in excess of costs accrued may be incurred. The most significant of the estimated liabilities are related to ongoing remediation efforts.

One of our largest shipyards is located in San Diego, California. Pursuant to a demand from the California Regional Water Quality Control Board, we completed a study of sedimentary contamination in San Diego Bay. Once definitive clean-up criteria are established, we expect that we will be required to begin remediation procedures with respect to the contamination. We anticipate that the total cost associated with the remediation phase will range from \$6 million to \$9 million, although it is conceivable that costs could be as high as \$30 million if the most stringent clean-up standard were to be adopted. Up to \$9 million of such remediation costs, to the extent the costs are not recovered on USMR's government contracts or from other responsible parties, may be recoverable from USMR's former shareholders, under an escrow arrangement established in 1997 when the San Diego operation was acquired by USMR. Also, a further \$15 million escrow fund was established in our 2002 acquisition of USMR, which we believe is available in respect of USMR's sediment exposure. We have asserted claims against both escrow funds, primarily on account of the potential remediation exposure at San Diego.

Since approximately 1941, we (and, prior to our formation, Northern Ordnance, Inc. and then FMC) have operated a manufacturing and engineering facility in Fridley, Minnesota. The majority of the Fridley facility was historically owned by the U.S. Navy (the Navy property), but had been operated by us under contract with and on behalf of the Navy. In June 2004 we purchased the Navy property and most of the associated equipment for \$6.5 million. Since the early 1980's, the Navy has expended more than \$29 million in site investigation and remediation costs on the property, and the Navy has indicated that it anticipates spending a further \$10.3 million on such matters at the site. The Navy has engaged us in discussions as to whether we should pay a portion of its remediation expenses at Fridley, and offered to resolve the matter if we would pay approximately \$8.4 million for such purpose. We dispute any responsibility for such costs, and also believe that any remediation costs that we may incur concerning the Navy property would constitute Allowable Costs. However, there is substantial uncertainty regarding the ultimate terms on which the matter might be resolved.

8. Acquisitions

On February 5, 2004, we completed the acquisition of the assets of Kaiser Compositek, Inc. (KCI) for an initial purchase price of \$8.3 million. KCI, located in Brea, California, is a provider to government and industry sectors with particular emphasis on primary structures fabricated with polymeric composites. The acquisition is expected to enhance and expand our development of advanced weapon systems and combat vehicles.

UNITED DEFENSE INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On March 1, 2004 we purchased certain assets and liabilities of the Pearl Harbor, Hawaii Ship repair operations of Pacific Shipyards International, LLC and Honolulu Shipyards, Inc. for a purchase price after adjustments of \$15 million. The Pearl Harbor ship repair business is being operated by a newly formed subsidiary, Hawaii Shipyards, Inc. (HSI), which positions USMR as the largest private supplier of ship repair and overhaul services for naval vessels stationed in Pearl Harbor, Hawaii, which is the third largest homeport for naval vessels. Principals of the predecessor entity serve as directors of HSI.

On March 1, 2004 we completed the acquisition of Cercom, Inc. of Vista, California for the purchase price of \$21.2 million. Cercom is a producer of advanced ceramic materials and supplier of light-weight ceramic armor. The acquisition is expected to enhance our market presence regarding survivability solutions in specialty metals and composites.

9. Earnings Per Share

Basic and diluted earnings per share results for all periods presented were computed based on the net income for the respective periods. The weighted average number of common shares outstanding during the period was used in the calculation of basic earnings per share and this number of shares was increased by the effects of dilutive stock options based on the treasury stock method in the calculation of diluted earnings per share. The dilutive stock options for the quarters ended June 30, 2004 and 2003 were 932,837 and 896,045, respectively and for the six months ended June 30, 2004 and 2003 were 946,867 and 887,271, respectively.

10. Information on Business Segments

We operate in two reportable business segments: Defense Systems and Ship Repair and Maintenance. USMR is categorized under the business segment Ship Repair and Maintenance. All other business operations are categorized as Defense Systems. We use earnings before interest and taxes as the measure of financial performance for each segment.

UNITED DEFENSE INDUSTRIES, INC.

UNITED DEFENSE INDUSTRIES, INC.

NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

11. Income Taxes

We account for income taxes under the liability method. Under this method, deferred tax assets and liabilities are determined based on differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws expected to be effective when these differences reverse.

The provisions for income taxes for the three and six months ended June 30, 2004 were \$27.7 million and \$52.9 million, respectively, which increased by \$3.7 million and \$3.2 million, respectively from the same periods in 2003 primarily due to higher taxable income. The income tax provision in 2004 reflects an effective tax rate of 39%.

12. Related Party Transactions

In October 1997, The Carlyle Group (Carlyle) formed United Defense Industries, Inc. as a wholly-owned entity in order to acquire our predecessor, United Defense, L.P. Beginning with our initial public offering in December 2001, Carlyle began to sell major portions of its United Defense holdings. On April 30, 2004 Carlyle completed the sale of its remaining 4.5 million United Defense shares. In connection with our initial public offering, we entered into agreements with Carlyle pursuant to which Carlyle had the right to designate up to four nominees for our Board of Directors, so long as Carlyle owned greater than 20% of our voting stock. By virtue of Carlyle's sales of United Defense shares, such agreements have lapsed. Nonetheless, three individuals affiliated with Carlyle (Messrs. Carlucci, Clare, and Conway) were re-elected to our Board of Directors at our annual meeting on April 13, 2004, and Carlyle may thereby continue to influence our operations.

Commencing with Carlyle's acquisition of United Defense in October 1997, we agreed to pay Carlyle for various management and consulting services under a management agreement with Carlyle. The management agreement was terminated in March 2004, and in connection with the termination, we made a final payment of \$3.0 million to Carlyle for services rendered from January 1, 2002 through March 31, 2004. We had not previously paid to Carlyle for services during this period.

In June 2002 we entered into an agreement with CPU Technology, Inc. (CPU/ T) to purchase component and design services regarding electronic subsystems for the Bradley program. We currently have \$2.8 million in purchase orders with CPU/ T. Certain Carlyle affiliates are minority stockholders of CPU/ T and collectively have the right to appoint two of the six members of CPU/ T's board.

We recognized \$9.1 million and \$6.3 million of royalties, license fees and technical service fees during the six month periods ended June 30, 2003 and 2004, respectively, from our Turkish joint venture.

Our subsidiary, HSI, makes purchases of goods and services from various entities which are owned and controlled by its current officers or directors. Purchases are made pursuant to teaming agreements, other preferred supplier agreements, and purely competitive procurements. The aggregate amount of purchases by HSI from all related party businesses during the three and six month periods ended June 30, 2004 were \$1.7 million and \$1.8 million respectively. It is our policy that any transactions with related parties be on terms that are no less favorable than those available from unrelated third parties. The transactions with related parties entered into by our subsidiary HSI are on terms that we believe are consistent with this policy.

Item 2. Management's Discussion and Analysis of the Results of Operations and Financial Condition June 30, 2004
Special Note Regarding Forward Looking Statements

Our Form 10-Q disclosure and analysis concerning our operations, cash flows and financial position, including, in particular, the likelihood of our success in developing and expanding our business and the realization of sales from our backlog, include forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. Statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as expects, anticipates, intends, plans, believes, estimates and similar expressions are forward-looking statements. Although these statements are based upon assumptions we consider reasonable, they are subject to risks and uncertainties that are described more fully below and in our annual report on Form 10-K for the year ended December 31, 2003, our quarterly report on Form 10-Q for the quarter ended March 31, 2004, and our Prospectus Supplement dated April 26, 2004. Accordingly, we can give no assurance that we will achieve the results anticipated or implied by our forward-looking statements.

Overview

United Defense is a leader in the design, development and production of combat vehicles, artillery systems, naval guns, missile launchers and precision munitions used by the U.S. Department of Defense (DoD) and more than 40 foreign militaries, and is the leading U.S. provider of non-nuclear ship repair, modernization and conversion services to the U.S. Navy and related government agencies. For many of our key DoD programs, we are either the sole-source prime contractor and systems integrator or have been selected as the subcontractor to provide a major element or system in the overall program. We conduct global operations through our manufacturing facilities in the United States and Sweden, our ship repair facilities in key homeport locations for the U.S. Navy, a manufacturing joint venture in Turkey, and co-production programs with various other governments and foreign contractors.

The Carlyle Group (Carlyle) formed United Defense Industries, Inc. in October 1997 to facilitate the acquisition of United Defense, L.P., our predecessor entity. In July 2002 we acquired USMR from Carlyle. On April 30, 2004, Carlyle completed the sale of the final portion of its holdings of our common stock.

We had a firm funded backlog of approximately \$2.2 billion as of June 30, 2004, a substantial majority of which was derived from sole-source, prime contracts. Approximately 81% of our sales for the six months ended June 30, 2004 were to the U.S. Government, primarily to agencies of the DoD (excluding sales conducted under DoD Foreign Military Sales programs), or through subcontracts with other government contractors.

Our results of operations, particularly revenue, gross profits and cash flows, vary significantly from period to period, depending largely upon the timing of our delivery of finished products, the terms of our contracts and our level of export sales. As a result, period-to-period comparisons may show substantial changes disproportionate to our underlying business activity. Period-to-period comparisons are also affected by acquisitions where the results of operations for the acquired business are included in our results only for periods subsequent to the date of acquisition.

Our contracts typically fall into two categories, cost-plus and fixed-price. Our contracts for research, engineering, prototypes, and some other matters are typically cost-plus arrangements, under which we are reimbursed for approved costs and also receive a fee. Our production contracts are typically fixed-price arrangements under which we assume the risk of cost overruns and receive the benefit of cost savings. Our repair and maintenance contracts are a mix of fixed-price and cost-plus arrangements with a recent trend toward cost-plus. All of our DoD contracts, whether we are the prime contractor or a subcontractor, are subject to audit and cost controls. As a result, the DoD has the right to object to our costs as being unallowable in kind or amount, which can preclude recovery of these costs on both cost-plus and negotiated fixed-price contracts.

Edgar Filing: UNITED DEFENSE INDUSTRIES INC - Form 10-Q

There were no material changes to our major programs from those described in our Form 10-K Report for the year ended December 31, 2003, other than normal additional funding as new contracts are negotiated and awarded, and the Mk-38 Minor Caliber Gun System program described below. See, however, the discussion under *Emerging Trends and Uncertainties* below.

Mk-38 Minor Caliber Gun System

In June 2004, we received a contract for production, engineering support and spares for the MK 38 Mod 2 Machine Gun System Alteration program from the U.S. Navy with a value that could reach \$395.5 million. This is our first major award for a minor caliber gun. The Mk 38 Machine Gun System is used aboard U.S. Navy surface combatant ships for ship self-protection. The current gun system features a 25-mm man-operated cannon that is not stabilized. Under this program, we will upgrade the 25-mm cannon with a fully stabilized gun mount that can be fired remotely. The gun mount includes on-board target acquisition capabilities that can detect targets and control the fire of the gun.

Under the contract, we expect to receive orders for Mk 38 Mod 2 Machine Gun Systems throughout the life of the contract through 2010. We have received the first order, totaling \$6.8 million under this contract, for eight upgraded Mk 38 Mod 2 Machine Gun Systems and spares, to be delivered in late 2004. Under the terms of the contract, the Navy can order additional Mk 38s and support through 2010, up to the \$395.5 million contract ceiling.

Business Segments, Products and Programs

We operate in two business segments: Defense Systems and Ship Repair and Maintenance. Our Defense Systems program portfolio consists of a mix of weapons systems development, production, upgrade and life cycle support programs. Our Ship Repair and Maintenance business segment consists of ship repair, maintenance, and modernization service programs. Revenue generated from each of our major programs is summarized below.

	Three Months Ended June 30,		Six Months Ended June 30,	
	2003(a)	2004	2003(a)	2004
	(In millions)		(In millions)	
Defense Systems:

(a) 2003 revenue by program modified for changes in program categories. No changes to segment or total period revenue.

(b) Modified to include Bofors naval ordnance program revenues previously included in *Other*.

(c) Future Combat Systems including Non Line-of-Sight Cannon previously included in *Artillery Systems*.

(d)

Edgar Filing: UNITED DEFENSE INDUSTRIES INC - Form 10-Q

Modified to include Bofors artillery program revenues previously included in Other and move Future Combat Systems to separate category.

For a more detailed description of our business and principal operating programs, see our Form 10-K Report for the year ended December 31, 2003.

Emerging Trends and Uncertainties

We expect our Turkish joint venture entity, FNSS, to complete its existing vehicle production contracts by December 31, 2004. Although FNSS is pursuing opportunities for further combat vehicle work, no contracts have yet been signed, and we accordingly expect FNSS to experience at least a break in production work beginning at year end. (If FNSS is ultimately unsuccessful at obtaining further contracts, of course, that break would most likely turn into a permanent shutdown.) Under such circumstances, we discontinued recording our share of earnings from FNSS in the second quarter, and would also expect royalty income from the venture to cease during the first quarter of 2005. The discontinuance of FNSS earnings from the remainder of 2004 would, unless replaced by other sources, cause our profit before tax for the year to decline by approximately \$20 million from 2003. If neither earnings nor royalties should resume from FNSS during 2005, our profit before tax for the year would, unless replaced by other sources, decline by approximately \$13 million from 2004.

Regarding our U.S. land combat vehicle business, we have previously noted that the period during which the U.S. Army continues to award significant work on Current Force vehicles which we produce, such as the Bradley, may not dovetail with the period during which the Army begins to call for production of replacement designs, such as the Manned Ground Vehicles envisioned for the Future Combat Systems (FCS) program. (See Management's Discussion and Analysis Emerging Trends and Uncertainties Land Combat Vehicles in our Report on Form 10-K for the year ended December 31, 2003.) To the extent that a substantial gap were to develop between the completion of Bradley work and the commencement of FCS production, we have noted that a prolonged suspension of production could reduce our workforce and employee skill base and necessitate the contraction of our manufacturing facilities.

Recent developments regarding both the Bradley and FCS programs, taken in combination, may affect the risk of a production suspension. Regarding FCS, the Army has announced a restructuring of the program intended to (i) accelerate the movement of some FCS technologies into Current Force vehicles, (ii) obtain pre-production artillery vehicles (the NLOS-C vehicle, for which we have design responsibility) by 2008 and begin regular fielding of the vehicles by 2010, and (iii) postpone the fielding of most other new FCS vehicles to 2014. Regarding the Bradley program, Congress recently included \$275 million for further Bradley modernization in its FY05 appropriation for DoD, which we believe would provide continued production work for us until mid-2007. Also, the Army has proposed to restructure its combat force in a way which would call for the modernization of 600 or more additional Bradleys. The Army has not yet indicated when it would seek such modernization funding, nor the exact configuration to which the additional vehicles would be modernized, but much of our prior Bradley modernization work has generated revenues of \$1 million or more per vehicle. The modernization of the additional Bradleys, if ultimately approved by DoD, funded by Congress, and awarded to us, would likely be performed over approximately a three-year period beginning during 2005. The combined effect of the FCS and Bradley developments would most likely be to at least postpone the risk of a production suspension.

Results of Operations

The following table summarizes key income statement financial results:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2003	2004	2003	2004
	(In thousands)		(In thousands)

Revenue

Edgar Filing: UNITED DEFENSE INDUSTRIES INC - Form 10-Q

Revenue of \$576.3 million for the three months ended June 30, 2004 was \$22.8 million, or 4% higher than the \$553.5 million for the comparable period in 2003. Defense Systems segment revenue of \$424.8 million was \$10.6 million lower than the \$435.4 million in the second quarter of 2003 driven by timing of Bradley and Assault Amphibious Vehicle deliveries. Ship Repair and Maintenance segment revenue of \$151.5 million was \$33.5 million, or 28.4% higher than the same period in 2003 when our U.S. Navy workload was partially disrupted due to the deployment of vessels for Operation Iraqi Freedom. In addition, higher sales in the quarter ended June 30, 2004 reflect continued focus by the U.S. Navy on ship maintenance in anticipation of future operations.

Edgar Filing: UNITED DEFENSE INDUSTRIES INC - Form 10-Q

Revenue of \$1.1 billion for the six months ended June 30, 2004 was \$103.4 million, or 10.1% higher than the same six month period in 2003. Ship Repair and Maintenance segment revenue was \$288.7 million, or 18.3% higher than the same period in 2003 due partially to the 2003 deployment of vessels for Operation Iraqi Freedom and partially to the 2004 U.S. Navy focus on ship maintenance in anticipation of future operations. Defense Systems segment revenue for the six months ended June 30, 2003 of \$834.7 million was \$58.7 million, or 7.6% higher than the year-earlier period driven by increased DD(X) Advanced Gun System (AGS) and FCS development work, as well as a surge in deliveries of vehicle components and spare parts.

Gross profit

Gross profit of \$121.1 million for the three-month period ended June 30, 2004 was \$14.8 million higher than the \$106.3 million for the corresponding period in 2003. Gross profit as a percentage of sales for the three months ended June 30, 2004 was 21.0% compared with 19.2% for the same period in 2003. The Defense Systems segment's gross profit rate for the three months ended June 30, 2004 and 2003 was 24.1% and 20.4%, respectively. The higher gross profit rate in 2004 was due to an increase in royalties from our Turkish joint venture and improved operating margins throughout the segment. The Ship Repair and Maintenance segment's gross profit rate was 12.2% for the three months ended June 30, 2004 compared with 14.7% in the prior year period due primarily to the timing of award fees on cost plus contracts.

Gross profit of \$233.1 million for the six months ended June 30, 2004 was \$22.9 million higher than the \$210.2 million for the same period in 2003. Gross profit as a percent of sales for the six months ended June 30, 2004 was 20.7% compared with 20.6% in the same prior period. The Defense Systems segment gross profit rate for the six months ended June 30, 2004 and 2003 was 24.0% and 22.9%, respectively. The higher gross profit rate in 2004 was due to improved profit margins on production and spare part contracts. The Ship Repair and Maintenance segment gross profit as a percent of sales for the six months ended June 30, 2004 and 2003 was 11.5% and 13.3%, respectively. The lower gross profit rate in 2004 is due primarily to the timing of award fees.

Selling, general and administrative expenses

Selling, general and administrative expenses for the three months ended June 30, 2004 were \$38.4 million, or \$3.5 million lower than the \$41.9 million for the same period in 2003. Selling, general and administrative expenses for the six months ended June 30, 2004 and 2003 were \$77.1 million and \$78.9 million, respectively. The reduction is due primarily to reduced amortization of intangible expense and higher proposal costs in 2003 associated with the FCS program.

Research and development

Research and development spending was \$9.2 million for the three months ended June 30, 2004 compared with \$4.2 million for the corresponding prior period. Research and development spending for the six months ended June 30, 2004 and 2003 was \$15.8 million and \$6.0 million, respectively. These increases were primarily associated with higher spending on several projects related to new market opportunities such as for active protection and a risk mitigation project.

Earnings from foreign affiliates

Earnings from foreign affiliates was \$0.6 million for the three months ended June 30, 2004, a decrease of \$5.5 million from the \$6.1 million for the same period last year. Earnings from foreign affiliates in the six months ended June 30, 2004 and 2003 were \$6.4 million and \$11.7 million, respectively. Due to the diminished outlook for the receipt of future dividends from FNSS, our Turkish joint venture, we discontinued recording our share of earnings from FNSS in the second quarter of 2004.

Interest expense

Net interest expense was \$5.5 million in the three months ended June 30, 2004 compared with \$6.2 million in the same period in 2003. Net interest expense for the six month period ended June 30, 2004

and 2003 was \$11.0 million and \$12.8 million, respectively. The lower interest expense in 2004 was primarily due to a lower debt level in 2004.

Provision for Income Taxes

The income tax provision for the three-month period ended June 30, 2004 was \$27.7 million compared with \$24.1 million for the same prior period. The income tax provisions for the six months ended June 30, 2004 and 2003 were \$52.9 million and \$49.6 million, respectively. The provision for income taxes is based on an estimated annual effective income tax rate of 39% and 40% for 2004 and 2003, respectively.

Liquidity, Capital Resources and Financial Condition

Cash provided by operating activities was \$105.3 million for the six-month period ended June 30, 2004 compared with \$98.8 million in the same prior period, a \$6.5 million increase. The primary reason for the increase was higher net income.

Cash used in investing activities was \$64.1 million for the six-month period ended June 30, 2004 compared with \$23.7 million in the prior year period. The increase is primarily attributable to three acquisitions we made during the six-month period: Kaiser Compositek for \$8.3 million, Cercom for \$21.2 million, and Hawaii Shipyards for \$15 million. Additionally, in June, 2004 we completed a \$6.5 million purchase from the U.S. Navy for its portion of the land and facility which we operate in Fridley, Minnesota.

Cash used in financing activities was \$50.9 million for the six-month period ended June 30, 2004, compared with \$1.6 million of cash provided in the same period in 2003. We purchased \$29.2 million in shares of United Defense stock under a stock repurchase program initiated during the second quarter of 2004. In addition, our debt repayment during the six-month period ended June 30, 2004 was \$29.6 million versus none in the same period in 2003 per our repayment schedule. Proceeds from the exercise of stock options increased to \$7.8 million in 2004.

Based on current levels of operations and anticipated growth, we believe that our cash from operations, together with other available sources of liquidity, including borrowings available under the revolving credit facility, will be sufficient to fund anticipated capital expenditures and make required payments of principal and interest on debt, including payments due under our senior credit facility, for the foreseeable future. Additionally, the cash on hand is sufficient to permit the company to continue to execute a share repurchase of up to the remaining \$70.8 million authorized by our Board of Directors.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk June 30, 2004*

All of our financial instruments that are sensitive to market risk are entered into for purposes other than trading.

Forward Currency Exchange Risk

We conduct some of our operations outside the United States in functional currencies other than the U.S. dollar. To mitigate the risk associated with fluctuating currencies on short-term and long-term foreign currency-denominated transactions, we enter into foreign currency forward exchange contracts. We do not enter into foreign currency forward exchange contracts for trading purposes.

Interest Rate Risk

Borrowings under our senior secured credit facility are sensitive to changes in interest rates. As of June 30, 2004 the weighted average interest rate on the \$72.5 million Term A borrowings and on the \$474.9 million Term B borrowings was 3.42%. Loans made pursuant to the Term A loan facility require equal quarterly amortization payments of \$6.3 million, with a final payment due on August 13, 2007. On April 29, 2004, we made a mandatory \$9.9 million debt repayment to the Term A lenders pursuant to the excess cash flow provisions in the current credit facility. This payment eliminated the amortization payment due to the Term A lenders on June 30, 2004 and reduces the Term A amortization due on September 30, 2004 by

\$3.6 million. Loans made pursuant to the Term B facility require quarterly amortization payments of \$6.7 million beginning on March 31, 2004 until June 30, 2007, and \$49.4 million each quarter thereafter, with the final payment being due on August 13, 2009.

In January 2002, we entered into an interest rate protection agreement to mitigate risks associated with variable interest rate borrowings under our senior secured credit facility. The specified contract amount of this interest rate swap agreement is \$173 million. The agreement entitles us to pay a base interest rate of 3.45%, in return for the right to receive a floating interest rate which is based on three-month LIBOR as of each quarterly measurement date. In the event the three-month LIBOR at the measurement date exceeds 6%, the base interest rate is adjusted to the then effective LIBOR up to a maximum of 8%. USMR had also entered into an interest rate protection agreement to mitigate risks associated with variable interest rate borrowings. The specified amount of the agreement is \$20 million which matured on January 29, 2004. The net cash amounts paid or received on these agreements are accrued and recognized as an adjustment to interest expense.

Item 4. Controls and Procedures

We maintain disclosure controls and procedures designed to ensure that information required to be disclosed in our Company's Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Also, from time to time we make investments in unconsolidated entities, the largest of which has been the 51% ownership position we have held in our Turkish affiliate since 1989. As we do not control or manage such entities, the disclosure controls and procedures with respect thereto may be substantially more limited than those we maintain with respect to our consolidated subsidiaries.

As of June 30, 2004, we carried out an evaluation, under the supervision and with the participation of our management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective.

There have been no significant changes in our internal controls or in other factors that could significantly affect the internal controls subsequent to the date we completed the evaluation.

PART II

OTHER INFORMATION

June 30, 2004

Item 2. Repurchase of Common Stock by the Issuer

The following table provides the information related to our repurchase of common stock starting in May 2004.

Period	Total Number of Shares (or Units) Purchased	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(In thousands)
				Approximate Dollar Value of Shares (or Units) that may yet be Purchased Under the Plans or Programs
April 1 to April 30, 2004	0	\$	0	\$ 100,000
May 1 to May 30, 2004	269,500	34.30	269,500	90,756
June 1 to June 30, 2004	599,300	33.26	599,300	70,823

In March 2004, the board of directors authorized the purchase of up to \$100 million of our common stock. The repurchase plan was announced on March 5, 2004 and expires on March 5, 2005. During the second quarter of 2004 we repurchased 868,800 shares at an aggregate cost of \$29.2 million.

Item 4. Submission of Matters to a Vote of Security Holders

We held our annual meeting of stockholders on April 13, 2004. The matters voted upon at the meeting and the corresponding results are set forth below.

1. The election of nine directors to hold office until next annual meeting of stockholders and until their respective successors have been elected or appointed:

	For	Withheld
Frank C. Carlucci	31,414,237	18,534,302
Peter J. Clare	48,068,506	1,880,033
William E. Conway, Jr.	49,157,168	791,371
C. Thomas Faulders, III	48,093,621	1,854,918
Robert J. Natter	49,816,316	132,223
J.H. Binford Peay, III	47,683,222	1,165,317
Thomas W. Rabaut	49,499,580	445,959
Francis Raborn	49,157,168	791,371
John M. Shalikashvili	30,874,057	19,074,482

2. Stockholder approval of the amendment and restatement of the United Defense Stock Option Plan to (i) increase the number of shares issuable under the plan by 2,000,000 shares, (ii) qualify the plan for awards which may satisfy the requirements of performance based compensation under Section 162(m) of the Internal Revenue Code of 1986 as amended, and (iii) add the ability to make grants of other equity-based compensation.
