SIFY TECHNOLOGIES LIMITED and Subsidiaries
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(In thousands, except share data and as stated otherwise)

1. Description of business

Sify Technologies Limited (Sify) together with its subsidiaries (India World Communications Limited, Sify Communications Limited, Sify Networks Private Limited and Sify International Inc.) (collectively referred to as the Company) is engaged in providing various services, such as Corporate Network and Data Services, Internet Access Services, Online Portal and Content Offerings and selling products related to such services.

2. Summary of significant accounting policies

a. Basis of preparation of financials statements

The accompanying unaudited condensed financial statements have been prepared in accordance with U.S GAAP in Indian Rupees (Rs), the national currency of India. Solely for the convenience of the reader, the financial statements as of and for the nine months ended December 31, 2007 have been translated into United States dollars at the noon buying rate in New York City on December 31, 2007 for cable transfers in Indian rupees, as certified for customs purposes by the Federal Reserve Bank of New York of U.S. \$1 = Rs 39.41 No representation is made that the Indian rupee amounts have been, could have been or could be converted into United States dollars at such a rate or at any other rate on, December 31, 2007 or at any other date.

b. Interim Information

Interim information presented in the condensed consolidated financial statements has been prepared by the management without audit and, in the opinion of management, includes all adjustments of a normal recurring nature that are necessary for the fair presentation of the financial position, results of operations, and cash flows for the periods shown, is in accordance with US GAAP. These financial statements should be read in conjunction with the consolidated financial statements and related notes included in the Company s annual report on Form 20-F for the fiscal year ended March 31, 2007.

c. Investment securities.

The Company classifies its debt and equity securities in one of the three categories: trading, held-to-maturity or available-for-sale, at the time of purchase and re-evaluates such classifications as of each balance sheet date. Trading and available-for-sale securities are recorded at fair value. Held-to-maturity securities are recorded at amortized cost, adjusted for the amortization or accretion of premiums or discounts. Unrealized holding gains and losses on trading securities are included in income. Temporary unrealized holding gains and losses, net of the related tax effect, on available-for-sale securities are excluded from income and are reported as a part of other comprehensive income in stockholders equity until realized. Realized gains and losses from the sale of trading and available-for-sale securities are determined on a first-in-first out basis and are included in income. A decline in the fair value of any available-for-sale or held-to-maturity security below cost that is deemed to be other than temporary results in a reduction in carrying amount to fair value with a charge to the income statement. Fair value for mutual fund units is based on published per unit value, which is the basis for current transactions. Non-readily marketable equity securities for which there is no readily determinable fair value are recorded at cost, subject to an impairment charge to the income statement for any other than temporary decline in value.

d. Recent accounting pronouncement

SFAS No. 157:

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements SFAS No. 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. SFAS No. 157 provides guidance on determination of fair value and lays down the fair value hierarchy to classify the source of information used in fair value measurement. The Company is currently evaluating the impact of SFAS No. 157 on its financial statements and will adopt the provisions of SFAS No. 157 for the fiscal year beginning April 1, 2008.

SFAS No. 159:

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS No. 159). This statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS No. 159 is effective for the fiscal year beginning April 1, 2008. The Company is currently evaluating the impact that the adoption of SFAS No. 159 will have on its consolidated financial statements.

SFAS No. 141R:

In December 2007, the FASB issued SFAS No. 141 (revised 2007), Business Combinations (SFAS No. 141R), which is a revision of SFAS No. 141, Business Combinations. This statement establishes principles and requirements for how an acquirer: recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed and any noncontrolling interest in the acquiree; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. The Company will be required to apply this new standard prospectively to business combinations for which the acquisition date is on or after the beginning of the annual reporting period beginning on or after December 15, 2008. Early adoption is prohibited. The Company is currently evaluating the impact of SFAS No. 141R on its consolidated financial statements.

3. Acquisition of Globe Travel Business

During the quarter ended June 2006, the Company acquired the business of Globe Travels which operates an online travel agency. Management believes that this acquisition marks Sify's entry into the fast growing online travel business, particularly e-ticketing, the category with highest revenues and fastest growth in online e-commerce today. The management also believes that the addition of a travel portal is in line with the Company's strategy of providing end-to-end services to Sify users. Price paid / payable amounting to Rs 116,219 (USD 2,571,303) in respect of the acquisition was allocated based on a preliminary allocation of estimated fair value (determined by the management) of the assets, properties and rights on the date of acquisition.

During the nine months ended December 31, 2007, the Company has finalised the purchase price allocation resulting in an increase in recorded goodwill from Rs 26,921 to Rs 36,200.

4. Income taxes

Effective April 1, 2007, the Company adopted Financial Accounting Standards Board Interpretation No. 48, Accounting for Uncertainty in Income taxes – An interpretation of Statement of Financial Accounting Standards No.109 (FIN 48). The interpretation prescribes a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions considered or to be considered in income tax returns. Historically, the Company has not incurred any penalties or interest relating to unrecognized tax benefits.

Upon adoption the Company did not have any liability for income tax relating to uncertain tax positions. The adoption of FIN 48 did not have any impact on the retained earnings or provision for taxation as of April 1, 2007. FIN 48 also requires that changes in judgment that result in subsequent recognition, de-recognition or change in a measurement of a tax position taken in a prior annual period (including any related interest and penalties) be recognized as a discrete item in the period in which the change occurs. This change will not impact the manner in which the Company recorded income taxes on an annual basis and did not impact its recorded income tax provision in the quarter ended December 31, 2007.

13. Earnings per share

In accordance with SFAS No. 128, *Earnings per Share*, basic earnings per share are computed using the weighted average number of common shares outstanding during the period. Diluted income / (loss) is computed by considering the impact of the potential issuance of ordinary shares on the weighted average number of shares outstanding.

A reconciliation of equity shares used in the computation of basic and diluted earnings per equity share is set out below:

	Quarter ended December 31,		Nine months ended December 31,	
	2006	2007	2006	2007
Earnings				
Net Profit / (loss)	41,571	26,199	172,530	(84,847)

Effect of dilutive equivalent shares-stock options	99,642	26,083	104,822	
Weighted average number of equity shares and equivalent shares outstanding	42,842,653	42,846,165	42,927,221	42,838,055

Certain potential ordinary shares were excluded from the calculation of diluted income/loss per share for the nine months period ended December 31, 2007 as the shares would have had an antidilutive effect due to the loss reported by the Company. The Company's outstanding shares include shares held with a depository to represent equity shares underlying the Company's ADSs.

14. Gratuity

The Company provides for gratuity, a defined benefit retirement plan (the Gratuity Plan) covering all employees. The Gratuity Plan commenced on April 1, 1997. The plan provides a lump sum payment to vested employees at retirement or termination of employment of an amount based on the respective employee's salary and the years of employment with the Company. The Company provides the gratuity benefit through annual contributions to a fund managed by the Life Insurance Corporation of India (LIC). Under this scheme, the settlement obligation remains with the Company, although the LIC administers the scheme and determines the contribution premium required to be paid by the Company.

Net gratuity costs for the quarter and period ended December 31, 2006 and 2007 included:

	Quarter ended December 31,		Nine months ended December 31,

18. Segment reporting

SFAS No 131, *Disclosures about Segments of an Enterprise and Related Information*, establishes standards for the way that public business enterprises report information about operating segments and related disclosures about products and services, geographic areas and major customers. The Company's operations predominantly relate to connectivity to enterprises and providing Internet access to retail subscribers (both home access and public access). The Company also operates portals, Sify.com, Samachar.com and SifyMax.in that provide a variety of India-related content to audiences both in India and abroad, and which generates revenue from advertisements and other value added services.

The primary operating segments of the Company are:

Corporate network/data services, which provides Internet, connectivity, security and consulting, hosting and managed service solutions;

Retail Internet access services, from homes and through cybercafés;

Online portal and content offerings; and

Other services, such as development of e-learning software.

The Chief Operating Decision Maker (CODM) evaluates the Company's performance and allocates resources to various strategic business units that are identified based on the products and services that they offer and on the basis of the market served. Revenue in relation to segments is categorized based on items that are individually identifiable to that segment. Bandwidth costs, which form a significant part of the total expenses, are allocated primarily between the corporate network/data services and Internet access services businesses as described below:

International bandwidth refers to bandwidth that is required for access to sites and offices outside the country. For all these businesses, bandwidth is allocated based on actual utilization captured by monitoring traffic per IP pool

assigned at the egress points. The Company has packet shapers in the main locations to monitor bandwidth use by each of the above categories of users. This information is used in determining norms like bandwidth per port and bandwidth per PC. The actual utilization is cross validated against assumptions / norms for each business.

National bandwidth refers to the inter-city link bandwidth implemented within the country. Inter-city link bandwidth was allocated based on the number of subscribers or iway cybercafés at non gateway points and the bandwidth sold to and used by business enterprises (determined using packet shapers). However, in order to strengthen its corporate business, the Company enhanced its national backbone to carry Internet traffic to the international fibre gateways, shifting from hybrid satellite and fibre gateways to fibre only gateways for international bandwidth. National bandwidth costs are now allocated based on international bandwidth allocation ratios because most of the traffic carried on the national backbone is directed towards the international gateways. The Company believes that the resulting allocations are reasonable.

Last mile costs related to dial-up access that can be directly identified to businesses are allocated directly. Spectrum charges that are paid for the license that has been provided to enable Sify to operate on the 5.7 GHz wireless spectrum are allocated based on the bandwidth that is used by the various businesses that use this spectrum. Certain expenses, such as depreciation, technology and administrative overheads, which form a significant component of total expenses, are not allocable to specific segments as the underlying services are used interchangeably. Management believes that it is not practical to provide segment disclosure of these expenses and, accordingly, they are separately disclosed as unallocated and adjusted only against the total income of the Company.

A significant part of the fixed assets used in the Company's business are not identifiable to any of the reportable segments and can be used interchangeably between segments. Management believes that it is not practicable to provide segment disclosures relating to total assets since a meaningful segregation of the available data is onerous. The Company operating segment information for the quarters ended December 31, 2006 and December 31, 2007 and for the Nine months ended December 31, 2006 and 2007 is given below:

2008	1,962
2009	7,275
2010	5,432
Total	14,669

20. Commitments and contingencies

- a) During the year ended March 31, 2006, the Company received a notice from the Income-Tax Department of India for the financial years 2002 and 2003 for a sum of Rs 103,000 stating that no withholding tax has been deducted in respect of international bandwidth and leased line payments made by the Company to international bandwidth / lease line service providers. Subsequently, the demand was revised to Rs 77,724 by the income tax authorities. Under the Income tax regulations the Company is required to pay such amounts in 12 monthly installments under protest if it seeks to dispute the demand. Accordingly, the Company has paid all installments under protest and challenged such demands. The Company believes that withholding taxes need not be deducted if the service provider did not have any permanent establishment in India and has not installed any equipment at the Company's premises. The Company has demonstrated to the tax authorities that international service providers neither had a permanent establishment in India nor installed any equipment at the Company's premises, and hence concluded that the likelihood of the loss contingency is remote and no provision for the loss contingency is considered necessary. The amounts paid under protest are included under Other assets.
- b) The Company has outstanding financial and performance guarantees for various statutory purposes and letters of credit totalling Rs 641,115 and Rs 649,193 as of March 31, 2007 and December 31, 2007 respectively. These guarantees are generally provided to governmental agencies.
- c) Additionally, the Company is also involved in lawsuits, claims and proceedings, which arise in the ordinary course of business. There are no such items pending that the Company expects to be material in relation to its business.

21. Legal proceedings

- a) The Company and certain of its erstwhile officers and directors are named as defendants in a securities class action lawsuit filed in the United States District Court for the Southern District of New York. This action, which is captioned In re Satyam Infoway Ltd. Initial Public Offering Securities Litigation, also names several of the underwriters involved in Sify's initial public offering of American Depositary Shares as defendants. This class action is brought on behalf of a purported class of purchasers of Sify's ADSs from the time of Sify's Initial Public Offering (IPO) in October 1999 through December 2000. The central allegation in this action is that the underwriters in Sify's IPO solicited and received undisclosed commissions from, and entered into undisclosed arrangements with, certain investors who purchased Sify's ADSs in the IPO and the aftermarket. The complaint also alleges that Sify violated the United States federal securities laws by failing to disclose in the IPO prospectus that the underwriters had engaged in these allegedly undisclosed arrangements. More than 300 issuers have been named in similar lawsuits.

In July 2002, an omnibus motion to dismiss all complaints against issuers and individual defendants affiliated with issuers was filed by the entire group of issuer defendants in these similar actions. In October 2002, the cases against the Company's executive officers who were named as defendants in this action were dismissed without prejudice. In February 2003, the court in this action issued its decision on defendants' omnibus motion to dismiss. This decision denied the motion to dismiss the Section 11 claim as to the Company and virtually all of the other issuer defendants. The decision also denied the motion to dismiss the Section 10(b) claim as to numerous issuer defendants, including the Company. On June 26, 2003, the plaintiffs in the consolidated IPO class action lawsuits currently pending against Sify and over 300 other issuers who went public between 1998 and 2000, announced a proposed settlement with Sify and the other issuer defendants. The proposed settlement provides that the insurers of all settling issuers will guarantee that the plaintiffs recover \$1 billion from non-settling defendants, including the investment banks who acted as underwriters in those offerings. In the event that the plaintiffs do not recover \$1 billion, the insurers for the settling issuers will make up the difference.

The Company believes that it has sufficient insurance coverage to cover the maximum amount that it may be responsible for under the proposed settlement. Although the Federal District Court has preliminarily approved the settlement, it is possible that the Federal District Court may not finally approve the settlement in whole or part. The Company believes the maximum exposure under this settlement, in the event that the plaintiffs recover nothing from the non-settling defendants, is approximately U.S. \$3.9 million, an amount which the Company believes is fully recoverable from the Company's insurer.

- b) The Company is party to additional legal actions arising in the ordinary course of business. Based on the available information, as of December 31, 2007, Sify believes that it has adequate legal defenses for these actions and that the ultimate outcome of these actions will not have a material adverse effect on Sify.

22. Acquisition of minority interest in Subsidiary

The Board of Directors of the Company at their meeting held on February 10, 2008 approved the merger of Sify Communications Limited, a subsidiary of the Company with retrospective effect from April 1, 2007, subject to approval by the shareholders, the Honourable High Court and other statutory authorities. The shareholders of the Company at the Extraordinary General Meeting held on March 17, 2008 have accorded their assent on the said merger. The Company has filed a petition with the Honourable High Court of Madras, India, for the proposed merger and is pending approval.

23. Reclassification

Certain prior periods' amounts have been reclassified to conform to the current period's presentation.

(v) increase of Rs 15.81 million or 15.88% from other corporate data services. The increase is partially offset by a decrease of Rs 16.14 million or 38.79% in the revenue from Safescrypt, as the one time business that we had in three months ended December 31, 2006 from Ministry of Company Affairs, was not repeated in three months ended December 31, 2007.

We intend to continue to focus on the reduction of our cash burn and generating cash surplus in fiscal 2008. Based upon our present business and funding plans, we believe that our cash and cash equivalents of Rs 1,262.40 million (\$32.03 million) as of December 31, 2007, excluding restricted cash included in current assets of Rs 629.10 million (\$15.96 million) and non current assets of Rs 1 million (\$0.03 million), is sufficient to meet our currently known requirements at least over the next twelve months. In light of the highly dynamic nature of our business, however, we cannot assure you that our capital requirements and sources will not change significantly in the future.

Cash balances held in foreign currency were Rs 389.47 million and Rs 12.46 million as of March 31, 2007 and December 31, 2007, respectively. Cash balances held in Indian currency were Rs 2,681.69 million and Rs 1,880.04 as of March 31, 2007, and December 31, 2007, respectively. These amounts include cash and cash equivalents and restricted cash.

Cash provided by operating activities for the nine months ended December 31, 2007 was Rs55.68 million (\$1.41 million). This is primarily due to significant increase in trade payables and accrued liabilities.

Cash used in investing activities for the nine months ended December 31, 2007 was Rs369.30 million (\$9.37 million) and principally consisted of establishment of a new data center and purchase of routers, modems, ports, servers and other capital equipment in connection with the expansion of our network of Rs 659.51 million (\$16.73 million), expenditure on intangible assets of Rs 13.49 million (\$0.34 million), and purchase of short term investments Rs 20.32 million (\$0.52 million).

Cash used in financing activities for the nine months ended December 31, 2007 was Rs 557.69 million (\$14.15 million) representing repayment to banks Rs 562.30 million (\$14.27 million) offset by proceeds from the issuance of common stock of Rs 4.66 million (\$0.12 million).

Although we have 348 points of presence in India, a need for expansion into smaller towns could arise as our corporate and data network services and broadband businesses grow. There are a number of ISPs and data/network service providers exiting the business and, depending on pricing and other terms, we may acquire one or more of these third parties. We will need to invest in technologies to increase the speed of the backbone and edge networks. We will also have to invest in wireless and wire line methods of last mile Internet access delivery. We may also add an owned access capability in the United States.

In the ordinary course of our business, we regularly engage in discussions and negotiations relating to potential investments, strategic partnerships, acquisitions and other strategic transactions. We will continue to be aggressive in our efforts to identify one or more investment or acquisition opportunities.

Income Tax Matters

For the year ended March 31, 2007, the end of our most recently completed fiscal year, we had a business loss (including unabsorbed depreciation without an expiration date) carry forward of approximately 3,491.21 million (87.83) for financial reporting purposes.

For fiscal 2008, the basic rate of corporate tax and surcharge were at 30% and 10% respectively, the education cess was 3% on the total tax, resulting in an effective tax rate of 33.99%.

Under the Indian Income Tax Act, income tax is payable on the total income as computed under the Income Tax Act in respect of the previous year (fiscal year) relevant to the assessment year. Where the tax payable on the total income is less than 10% (excluding surcharges) of the book profit (profit computed as per the provisions of the Indian Companies Act), the book profit after adjusting for accumulated losses or carried forward depreciation (which ever is lower) shall be deemed to be the total income of the assessee, and the tax payable by the assessee on such total income shall be the amount of income tax at the rate of 10% (excluding surcharges).

Under the current Indian Income Tax Act, we will be liable for payment of income tax only after we utilize the unabsorbed business loss of Rs1,151.5 million (\$26.7 million) (lower of carry forward depreciation or business loss). We cannot assure you that the current income tax rate will remain unchanged in the future. We also cannot assure you that the surcharge will be in effect for a limited period of time or that additional surcharges will not be levied by the Government of India.

The Finance Act, 2005 had introduced income tax on fringe benefits which is in addition to the income tax charged under the Income Tax Act, 1961. Fringe benefits tax (FBT) is payable by every employer in respect of fringe benefits provided or deemed to have been provided by the employer to his employees during the year. An employer is required to pay FBT even if no tax is payable on the total income. We have incurred an expenditure of FBT of Rs6.04 million (\$0.15 million) for the quarter ended December 31, 2007.

The Finance Act, 2007 had also introduced income tax on stock option grants to employees by way of Fringe Benefit Tax. As per this, FBT is payable by every employer in respect of stock options granted to its employees. FBT is calculated on the equity shares granted to the employees based on the fair market value of the equity shares on the date on which the option vests with the employee as reduced by the amount actually paid by or recovered from the employees in respect of such shares. The Act also permits the employer to recover the FBT from the employees who are exercising their options.

Item 3. Quantitative And Qualitative Disclosures About Market Risk

Fair value estimates are made at a specific point in time and are based on relevant market information about the financial instrument. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

We also face market risk relating to foreign exchange rate fluctuations, principally relating to the fluctuation of U.S. dollar to Indian rupee exchange rate. Our foreign exchange risk principally arises from accounts payable to overseas vendors. This risk is partially mitigated as we hold balances in foreign currency with overseas banks. Our foreign exchange gain/(loss) was Rs2.6 million Rs23.2 million and 8.33 million for fiscal years 2005, 2006 and 2007, respectively and Rs1.83 million for the quarter ended December 31,2007.
