PERFORMANCE DATA QUOTED REPRESENTS PAST PERFORMANCE, WHICH IS NO GUARANTEE OF FUTURE RESULTS, AND CURRENT PERFORMANCE MAY BE LOWER OR HIGHER THAN THE FIGURES SHOWN. FOR THE MOST RECENT MONTH-END PERFORMANCE FIGURES, PLEASE VISIT VANKAMPEN.COM OR SPEAK WITH YOUR FINANCIAL ADVISOR. INVESTMENT RETURNS, NET ASSET VALUE (NAV) AND COMMON SHARE MARKET PRICE WILL FLUCTUATE AND TRUST SHARES, WHEN SOLD, MAY BE WORTH MORE OR LESS THAN THEIR ORIGINAL COST.

NAV per share is determined by dividing the value of the trust's portfolio securities, cash and other assets, less all liabilities, by the total number of common shares outstanding. The common share market price is the price the market is willing to pay for shares of the trust at a given time. Common share market price is influenced by a range of factors, including supply and demand and market conditions. Total return assumes an investment at the beginning of the period, reinvestment of all distributions for the period in accordance with the trust's dividend reinvestment plan, and sale of all shares at the end of the period.

The Lehman Brothers Pennsylvania Municipal Bond Index is a broad-based statistical composite of Pennsylvania municipal bonds. The index is unmanaged and does not include any sales charges or fees. Such costs would lower performance. It is not possible to invest directly in an index.

Trust Report

FOR THE 6-MONTH PERIOD ENDED APRIL 30, 2005

Van Kampen Pennsylvania Value Municipal Income Trust is managed by the Adviser's Municipal Fixed Income team. (1) Current members include Dennis Pietrzak and John Reynoldson, Executive Directors of the Adviser; and Robert Wimmel, Vice President of the Adviser.

MARKET CONDITIONS

The six-month period ended April 30, 2005, was characterized by continued short-term interest rate increases. As crude oil prices reached record highs, the prospect of rising inflation also cast a shadow. The Federal Open Market Committee (the "Fed") raised the federal funds target rate 100 basis points during the period through a series of four "measured" 0.25 percent tightenings to 2.75 percent by the end of April. Although rates in the short and intermediate areas of the yield curve shifted upward as the Fed tightened, long-term interest rates fell as buyers did not seem deterred by the prospect of rising inflation. As a result, the yield curve (the difference between short and longer-term yields) flattened and the long end of the municipal market handily outperformed the shorter end.

The municipal market in total posted positive returns during the period, though it was not uniformly strong. In contrast to the strong showing by longer-term bonds, shorter-term municipals were hampered by the Fed's tightening and turned in a flat to slightly negative showing. Within the investment-grade segment of the market, yield differentials between BBB-rated and AAA-rated municipal securities were slightly wider, though BBB-rated securities still outperformed high grades due to their higher coupons, while securities rated below investment grade strongly outperformed as investors sought out their higher yields.

The Fed's interest rate hikes did not appear to dampen investors' appetites for municipal bonds, as net inflows into municipal bond funds topped \$290 million during the period. The supply of new issues was modest during the closing months of 2004 (the first two months of the period) before soaring in the opening months of 2005 as long-term issuers rushed to bring securities to market in anticipation of additional interest rate increases in the near term.

The most significant development in the Pennsylvania municipal market during the period was the ongoing trend of refundings of municipal securities by issuers. Municipal borrowers were able to take advantage of rising short-term rates and relatively stable long-term rates, which in turn allowed them to refund outstanding debt. As a result, the Pennsylvania market saw a wave of refinancings, especially in education-related sectors.

PERFORMANCE ANALYSIS

The trust's return can be calculated based upon either the market price or the net asset value (NAV) of its shares. NAV per share is determined by dividing the value of the trust's portfolio securities, cash and other assets, less all liabilities, by the total number of common shares outstanding, while market price reflects the supply and demand for the shares. As a result, the two returns can differ, as they did during the reporting period. On an NAV basis, the trust outperformed its benchmark index, the Lehman Brothers Pennsylvania

Municipal Bond Index. On a market price basis, the trust underperformed its benchmark.

PERFORMANCE DATA QUOTED REPRESENTS PAST PERFORMANCE, WHICH IS NO GUARANTEE OF FUTURE RESULTS, AND CURRENT PERFORMANCE MAY BE LOWER OR HIGHER THAN THE FIGURES SHOWN. INVESTMENT RETURN, NET ASSET VALUE AND COMMON SHARE MARKET PRICE WILL FLUCTUATE AND TRUST SHARES, WHEN SOLD, MAY BE WORTH MORE OR LESS THAN THEIR ORIGINAL COST. SEE PERFORMANCE SUMMARY FOR ADDITIONAL PERFORMANCE INFORMATION AND INDEX DEFINITION.

The trust uses leverage to enhance its dividend to common shareholders. The trust borrows money at short-term rates through the issuance of preferred shares. The proceeds are reinvested in longer-term securities, taking advantage of the difference between short- and longer-term rates. The Fed's policy of raising interest rates throughout the period made the trust's borrowing activity more expensive. These expenses, however, were more than offset by the positive performance of the bonds held by the trust.

One of our key strategies in managing the trust during the period was to position it for rising interest rates. This approach was largely the result of our analysis of interest rates, which remained relatively low by historical standards even after rising from their multi-decade lows earlier. First, we kept the trust's duration (a measure of interest-rate sensitivity) below that of its benchmark. Second, to limit the trust's exposure to areas of the market that would be most likely susceptible to rising rates, we trimmed the trust's shorter-maturity bonds. We reinvested the proceeds from those sales into bonds with premium coupons and maturities between 20 and 30 years. In addition to offering relatively attractive income streams, these securities positioned the trust to benefit from any future flattening of the yield curve.

3

We kept the trust's exposure well diversified across the major sectors of the Pennsylvania municipal market. Much of our relative-value trading activity was focused on selling issues that had been pre-refunded, many of which were in the public education sector; and purchasing what we believed to be more attractive securities in the public education sector. The trust remained focused on investment-grade securities, with 100 percent of the portfolio rated BBB or higher at the end of the period.

There is no guarantee the security sectors mentioned will continue to perform well or be held by the trust in the future.

(a) Total return assumes an investment at the common share market price at the beginning of the period indicated, reinvestment of all distributions for the period in accordance with the Trust's dividend reinvestment plan, and sale of all shares at the closing common share market price at the end of the period indicated.

(b) As required, effective November 1, 2001, the Trust has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began accreting market discount on fixed income securities. The effect of this change for the year ended October 31, 2002 was to increase net investment income per share by \$.01, decrease net realized and unrealized gains and losses per share by \$.01 and increase the ratio of net investment income to average net assets applicable to common shares by .08%. Per share, ratios and supplemental data for periods prior to October 31, 2002 have not been restated to reflect this change in presentation.

(c) Ratios do not reflect the effect of dividend payments to preferred shareholders.

(d) Ratios reflect the effect of dividend payments to preferred shareholders.

(e) Calculated by subtracting the Trust's total liabilities (not including the preferred shares) from the Trust's total assets and dividing this by the number of preferred shares outstanding.

VAN KAMPEN PENNSYLVANIA VALUE MUNICIPAL INCOME TRUST

NOTES TO FINANCIAL STATEMENTS -- APRIL 30, 2005 (UNAUDITED)

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen Pennsylvania Value Municipal Income Trust (the "Trust") is registered as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended. The Trust's investment objective is to seek to provide a high level of current income exempt from federal and Pennsylvania income taxes and, where possible under local law, local income and personal property taxes, consistent with preservation of capital. The Trust will invest substantially all of its assets in Pennsylvania municipal securities rated investment grade at the time of investment, but may invest up to 20% of its assets in unrated securities which are believed to be of comparable quality to those rated investment grade. The Trust commenced investment operations on April 30, 1993.

The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Edgar Filing: VAN KAMPEN PENNSYLVANIA VALUE MUNICIPAL INCOME TRUST - Form N-CSRS

A. SECURITY VALUATION Municipal bonds are valued by independent pricing services or dealers using the mean of the bid and asked prices or, in the absence of market quotations, at fair value based upon yield data relating to municipal bonds with similar characteristics and general market conditions. Securities which are not valued by independent pricing services or dealers are valued at fair value using procedures established in good faith by the Board of Trustees. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value.

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. The Trust may purchase and sell securities on a "when-issued" or "delayed delivery" basis, with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Trust will segregate assets with the custodian having an aggregate value at least equal to the amount of the when-issued or delayed delivery purchase commitments until payment is made. As of April 30, 2005, the Trust had \$3,354,723 of when-issued and delayed delivery purchase commitments.

C. INVESTMENT INCOME Interest income is recorded on an accrual basis. Bond premium is amortized and discount is accreted over the expected life of each applicable security.

D. FEDERAL INCOME TAXES It is the Trust's policy to comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

E. DISTRIBUTION OF INCOME AND GAINS The Trust declares and pays monthly dividends from net investment income to common shareholders. Net realized gains, if any, are distributed annually on a pro rata basis to common and preferred shareholders. Distributions from net realized gains for book purposes may include short-term capital gains, which are included as ordinary income for tax purposes.

The tax character of distributions paid during the year ended October 31, 2004 was as follows:

Distributions paid from:

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Trust's Investment Advisory Agreement, Van Kampen Asset Management (the "Adviser") will provide investment advice and facilities to the Trust for an annual fee payable monthly of .55% of the average daily net assets of the Trust. Effective November 1, 2004, the investment advisory fee was reduced from .60% to .55%.

For the six months ended April 30, 2005, the Trust recognized expenses of approximately \$3,000 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom LLP, of which a trustee of the Trust is a partner of such firm and he and his law firm provide legal services as legal counsel to the Trust.

Under separate Accounting Services and Legal Services agreements, the Adviser provides accounting and legal services to the Trust. The Adviser allocates the cost of such services to each trust. For the six months ended April 30, 2005, the Trust recognized expenses of approximately \$18,300 representing Van Kampen Investments Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing accounting and legal services to the Trust, which are reported as part of "Other" and "Legal" expenses, respectively, on the Statement of Operations.

Certain officers and trustees of the Trust are also officers and directors of Van Kampen. The Trust does not compensate its officers or trustees who are also officers of Van Kampen.

The Trust provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to

defer all or a portion of their compensation to a later date. Benefits under the retirement plan are payable upon retirement for a ten-year period and are based upon each trustee's years of service to the Trust. The maximum annual benefit per trustee under the plan is \$2,500.

3. CAPITAL TRANSACTIONS

At April 30, 2005 and October 31, 2004, paid in surplus related to common shares aggregated \$64,698,968.

Transactions in common shares were as follows:

	SIX MONTHS ENDED APRIL 30, 2005	YEAR ENDED OCTOBER 31, 2004
Beginning Shares.....	4,476,965	4,473,660
Shares Issued Through Dividend Reinvestment.....	-0-	3,305
	-----	-----
Ending Shares.....	4,476,965	4,476,965
	=====	=====

4. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$13,744,039 and \$13,578,754, respectively.

5. PREFERRED SHARES

The Trust has outstanding 1,800 Auction Preferred Shares ("APS"). Dividends are cumulative and the dividend rate is currently reset every seven days through an auction process. The rate in effect on April 30, 2005 was 2.850%. During the six months ended April 30, 2005, the rates ranged from 1.500% to 2.850%.

The Trust pays annual fees equivalent to .25% of the preferred share liquidation value for the remarketing efforts associated with the preferred auctions. These fees are included as a component of "Preferred Share Maintenance" expense on the Statement of Operations.

The APS are redeemable at the option of the Trust in whole or in part at the liquidation value of \$25,000 per share plus accumulated and unpaid dividends. The Trust is subject to certain asset coverage tests and the APS are subject to mandatory redemption if the tests are not met.

6. INDEMNIFICATIONS

The Trust enters into contracts that contain a variety of indemnifications. The Trust's maximum exposure under these arrangements is unknown. However, the Trust has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

7. DERIVATIVE FINANCIAL INSTRUMENTS

A derivative financial instrument in very general terms refers to a security whose value is "derived" from the value of an underlying asset, reference rate or index.

The Trust may invest up to 15% of its net assets in "inverse floating rate obligations." The inverse floating rate obligations in which the Trust may invest are typically created through a division of a fixed-rate municipal obligation into two separate instruments, a short-term obligation and a long-term obligation. The interest rate on the short-term obligation is set at periodic auctions. The interest rate on the long-term obligation which the

NOTES TO FINANCIAL STATEMENTS -- APRIL 30, 2005 (UNAUDITED) continued

Trust may purchase is the rate the issuer would have paid on the fixed-income obligation, (i) plus the difference between such fixed rate and the rate on the short-term obligation, if the short-term rate is lower than the fixed rate; or (ii) minus such difference if the interest rate on the short-term obligation is higher than the fixed rate. These securities have varying degrees of liquidity and the market value of such securities generally will fluctuate in response to changes in market rates of interest to a greater extent than the value of an equal principal amount of a fixed rate security having similar credit quality, redemption provisions and maturity. These securities tend to underperform the market for fixed rate bonds in a rising interest rate environment, but tend to outperform the market for fixed rate bonds when interest rates decline or remain relatively stable. Although volatile, inverse floating rate obligations typically offer the potential for yields exceeding the yields available on fixed rate bonds with comparable credit quality, coupon, call provisions and maturity. These securities usually permit the investor to convert the floating rate security counterpart to a fixed rate (normally adjusted downward), and this optional conversion feature may provide a partial hedge against rising rates if exercised at an opportune time.
