CNH Captures Awards for Most Innovative Designs in Engineering Products

LAKE FOREST, IL June 21, 2007 CNH (NYSE: CNH) this week won seven awards more than any other manufacturer from the American Society of Agricultural and Biological Engineers (ASABE) for the most innovative product designs to enter the market in 2006. The educational and scientific organization also singled out the company for a special award, having one product included in the Top 10 innovations from all previous winners since the program began.

CNH took AE50 honors, which were sponsored by ASABE's Resource magazine, for the following:

AFS Cotton Yield Monitor (Racine, Wis.) from Case IH, a unique Controller Area Network-based optical sensor, provides precise, real-time cotton flow information on a continuous basis while harvesting.

Module Express 625 Cotton Harvester (Racine, Wis.) from Case IH, a cotton picker that combines three field operations into one, greatly reducing cotton harvesting cost through use of an innovative on-board packing system.

Smart Sieve Grain Cleaning System (Zedelgem, Belgium), from New Holland, a patented self-leveling system that allows New Holland CS and CSX combines to separate high volumes of grain with minimum grain loss and maximum cleaning efficiency on side slopes of up to 25 percent, depending on the crop.

The Case IH Steiger® AccuSteer II System (Burr Ridge, Ill.), a redesign of the tightest-turning-radius tractor in the industry increases integration of the system into the base tractor systems while improving performance.

SuperSuite Compact Tractor Cab (New Holland, Pa.), now available factory-installed on New Holland model TC40DA and TC45DA Boomer compact tractors, provides superior all-direction visibility and a spacious, comfortable interior.

New Holland FastSteer Steering System (New Holland, Pa.) allows tractor operators to increase the speed of their steering as well as minimize the amount of effort required to execute that action.

New Holland Flexicoil SD550 Air Hoe Drill (New Holland, Pa.) alters the conventional folding methodology of large air seeding machines.

The special Top 10 recognition was for the **On-the-Go Two-Speed Shift** that gives operators of the New Holland Super Boom skid-steer loader Model Lx885 the ability to shift from high to low range at the touch of a fingertip. Among other manufacturers, Claas of America Inc. was accorded six AE50 awards; Deere & Co., four; and AGCO, three. Trimble Navigation, a CNH global positioning system partner, took two honors.
