PRECISION DRILLING CORPORATION ANNOUNCES  
68% INCREASE IN OPERATING RESULTS, EXCLUDING ONE-TIME ITEMS  
=====

Diluted earnings per share from continuing operations were \$0.02 in the third quarter of 2005 compared to \$0.31 in 2004. Diluted earnings per share from continuing operations was reduced by \$0.50 in 2005 as a result of a number of one time items the first of which is the \$65.5 million premium on repayment of the Corporation's outstanding debentures and the second of which is the \$20.3 million market value adjustment to the shares of Weatherford International Ltd. ("Weatherford") received on the sale of the Energy Services and International Contract Drilling divisions.

Excluding one time items related to the Corporation's recent asset disposal and reorganization activities, diluted earnings per share from continuing operations in the third quarter of 2005 was \$0.52 compared to \$0.31 in 2004. This 68% increase reflects the strong market for oilfield services in Canada and favorable weather conditions allowing activity levels to rise to meet demand. Increased demand has resulted in improved pricing for all of the Corporation's service offerings.

On August 31, the Corporation completed the sale of its Energy Services and International Contract Drilling divisions to Weatherford for a purchase price consisting of 26,000,000 common shares of Weatherford and \$1,130,000,000 cash

## Edgar Filing: PRECISION DRILLING CORP - Form 6-K

consideration and recognized an associated gain of \$1.262 billion. On September 13, Precision closed the sale of CEDA International Corporation, which carried on the Industrial Services business, for cash proceeds of \$274,000,000, recognizing a gain of \$123 million.

In September, the Corporation announced its intention to reorganize its remaining operations and holdings into an income trust and on October 4 the associated Notice of Special Meeting of Securityholders and Information Circular was mailed to securityholders. The special meeting to consider the conversion is scheduled to take place on October 31, 2005 with the actual conversion taking place on or about November 7, 2005. Pursuant to the reorganization, shareholders will be entitled to receive in exchange for each common share held (i) one unit of the Trust; (ii) their pro-rata share of the 26 million common shares of Weatherford owned by Precision; and (iii) their pro-rata share of up to \$850 million of cash. The Weatherford shares will not be subject to any resale restrictions, however, Precision will not be able to complete the reorganization or transfer the Weatherford shares until a registration statement filed by Weatherford is declared effective by the U.S. Securities and Exchange Commission. Based on current business conditions, it is anticipated that the Board of Trustees of the Trust will set the initial regular distributions to the Trust's unitholders at approximately \$0.24 per Trust Unit per month with the first such payment expected to be made in the month following the effective date of the reorganization.

Also in September, Precision provided irrevocable redemption notices for the repayment of all of its outstanding debentures and on October 17, 2005 paid approximately \$767 million to fulfill this obligation.

Hank Swartout, Precision's Chairman, President and Chief Executive Officer, noted that "Precision's continuing operations have not been impacted by the sale and trust conversion processes. Ultimately, Precision is a service company and continues to focus on what has made it successful, building and maintaining long-term customer relationships. We will continue to work closely with our

customers this winter to ensure a safe, efficient, and mutually successful drilling season."

Rig demand remains extremely strong and the wet weather conditions throughout the second quarter further enhanced the situation in the third quarter as ground conditions dried in July. The impact of this pent up demand resulted in an outstanding quarter for revenues and earnings as the backlog of wells to be drilled created a combination of positive factors. First, winter pricing held up through the spring and into the summer and second, whenever equipment became available there were customers that were prepared to put it to work immediately. This contributed to the 81% increase in operating earnings in the third quarter of 2005 relative to 2004.

Overall, the oil and gas service industry will benefit from the pricing leverage established from third quarter activity. Accordingly, increased pricing for the winter season will take effect in the fourth quarter.

All operating divisions reported significant revenue increases year over year. Well Servicing's 25% increase was somewhat lower than Contract Drilling's 43% increase due to the natural time lag between drilling and completing wells.

Operating costs were lower as a percentage of revenue despite crew wage increases that were implemented in the fourth quarter of 2004. Operating expenses declined from 58% of revenue in the third quarter of 2004 to 53% in 2005. Equipment repair and maintenance expenditures were lower on a per day basis as scheduled expenditures were spread over a higher activity level relative to last year. In addition, operating expenses have not increased as much as customer pricing.

General and administrative costs for the third quarter were slightly higher than the same period in 2004. As a percentage of revenue, general and administrative costs fell to 5.5% from 6.4 %. General and administrative costs should further decline as the corporate function continues to be sized to meet the needs of Precision's smaller business organization.

Depreciation expense remained relatively consistent as the impact of increased activity was offset by the change in the estimated useful life of drilling rigs from 4,150 to 5,000 utilization days effective January 1, 2005.
