ITEM 12. RESULTS OF OPERATIONS AND FINANCIAL CONDITION

On July 30, 2003, Kennametal Inc. ("Kennametal") issued a press release announcing financial results for its fourth quarter and fiscal year ended June 30, 2003.

The press release contains non-GAAP (generally accepted accounting principles) financial measures, including gross profit, operating expense, operating income, net income (loss) and diluted EPS in each case excluding special items. The special items include: restructuring charges, Widia integration costs electronics and goodwill impairment. Kennametal management excludes these items in measuring and compensating internal performance to better understand underlying operations. We believe investors should have available the same information that management uses to measure and compensate performance. Kennametal management believes that presentation of these non-GAAP financial measures provides useful information into the results of operations of the company for the current, past and future periods.

Edgar Filing: KENNAMETAL INC - Form 8-K

Kennametal also presents free operating cash flow in the press release. Free operating cash flow is a non-GAAP presentation and is defined as cash provided by continuing operations (in accordance with GAAP) less capital expenditures and proceeds from asset disposals. Free operating cash flow is considered to be an important indicator of Kennametal's ability to generate liquidity because it better represents cash generated from operations that can be used for strategic initiatives, dividends or debt repayment.

Additionally, during our quarterly teleconference we may use various non-GAAP financial measures to describe the underlying operating results. Accordingly, we have compiled below certain reconciliations as required by Regulation G.

Primary working capital

Primary working capital is a non-GAAP presentation and is defined as accounts receivable, net of allowance for doubtful accounts, plus inventories minus accounts payable. The most directly comparable GAAP number is working capital which is defined as current assets less current liabilities. We believe primary working capital better represents Kennametal's performance in managing certain assets and liabilities controllable at the business unit level and is used as such for internal performance measurement.

EBIT

EBIT is an acronym for Earnings Before Interest and Taxes and is not a calculation in accordance with GAAP. However, we believe that EBIT is widely used as a measure of operating performance and we believe EBIT to be an important indicator of the Company's operational strength and performance. Nevertheless, the measure should not be considered in isolation or as a substitute for operating income, cash flows from operating activities or any other measure for determining liquidity that is calculated in accordance with GAAP.

Adjusted sales

Kennametal adjusted sales as reported under GAAP for specific items including acquisitions and foreign currency translation. Management believes that adjusting the sales as reported under GAAP provides additional insight into the underlying operations. Management uses this information in reviewing operating performance and in the determination of compensation.

Adjusted Gross Profit

Kennametal adjusted gross profit as recorded under GAAP for specific items including Widia integration and restructuring charges. Management believes that the adjusted gross profit information is an important indicator of the Company's underlying operating performance.

Operating expense reconciliation:

Kennametal adjusted operating expense as reported under GAAP for Widia Integration, Restructuring charges, Widia operating expense, foreign exchange and decreased pension income. Management believes that the adjusted operating expense provides additional insight into the underlying operations. Management uses this information in reviewing operating performance and in the determination of compensation.

Debt-to-Capital:

Edgar Filing: KENNAMETAL INC - Form 8-K

Debt to equity in accordance with GAAP is defined as total debt divided by Stockholder's Equity and total debt. Debt to equity is defined by Kennametal as total current and long term debt divided by total Shareowner's equity plus minority interest plus total debt. Kennametal adjusted its debt to equity percentage for the additional minimum pension charge and electronics impairment that is recorded in equity. Management believes that the adjustment provides additional insight into the underlying capital structuring and performance of the company.
