PAYCHEX, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
February 28, 2009

Note A: Description of Business and Significant Accounting Policies

Description of business: Paychex, Inc. and its wholly owned subsidiaries (collectively, the Company or Paychex) is a leading provider of comprehensive payroll and integrated human resource and employee benefits outsourcing solutions for small- to medium-sized businesses in the United States (U.S.). The Company also has a subsidiary in Germany.

Paychex, a Delaware corporation formed in 1979, reports as one segment. Substantially all of the Company s revenue is generated within the U.S. The Company also generates revenue within Germany, which was less than one percent of its total revenue for the nine months ended February 28, 2009. Long-lived assets in Germany are insignificant in relation to total long-lived assets of the Company as of February 28, 2009.

Basis of presentation: The accompanying Consolidated Financial Statements have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to the Quarterly Report on Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statement presentation. The Consolidated Financial Statements include the consolidated accounts of the Company with all significant intercompany transactions eliminated. In the opinion of management, the information furnished herein reflects all adjustments (consisting of items of a normal recurring nature), which are necessary for a fair presentation of the results for the interim period. These financial statements should be read in conjunction with the Company s Consolidated Financial Statements and related Notes to Consolidated Financial Statements presented in the Company s Annual Report on Form 10-K as of and for the year ended May 31, 2008 (fiscal 2008). Operating results and cash flows for the nine months ended February 28, 2009 are not necessarily indicative of the results that may be expected for other interim periods or the full fiscal year ending May 31, 2009 (fiscal 2009).

PEO revenue recognition: Professional Employer Organization (PEO) revenue is included in service revenue and is reported net of direct costs billed and incurred which include wages, taxes, benefit premiums, and claims of PEO worksite employees. Direct costs billed and incurred were \$677.0 million and \$661.6 million for the three months ended February 28, 2009 and February 29, 2008, respectively, and \$1.9 billion for both the nine months ended February 28, 2009 and February 29, 2008.

PEO workers compensation insurance: Workers compensation insurance for PEO worksite employees is provided under a deductible workers compensation policy with a national insurance company. Claims are paid as incurred and the Company s maximum individual claims liability is \$1.0 million under both its fiscal 2009 and fiscal 2008 policies.

Table of Contents**Note A: Description of Business and Significant Accounting Policies - continued**

The Company has recorded the following amounts on its Consolidated Balance Sheets for workers' compensation claims as of:

In thousands	February 28, 2009	May 31, 2008
Prepaid expense	\$ 2,477	\$ 2,612
Current liability	\$ 7,335	\$ 8,395
Long-term liability	\$18,456	\$18,294

The amounts included in prepaid expense on the Consolidated Balance Sheets relate to the policy for the fiscal year ended May 31, 2004, which was a pre-funded policy.

Estimating the ultimate cost of future claims is an uncertain and complex process based upon historical loss experience and actuarial loss projections, and is subject to change due to multiple factors, including economic trends, changes in legal liability law, and damage awards, all of which could materially impact the reserves as reported. Adjustments to previously established reserves are reflected in the results of operations for the period in which the adjustment is identified. Such adjustments could possibly be significant, reflecting any variety of new and adverse or favorable trends.

Stock-based compensation costs: The Company has stock-based awards to employees consisting of stock options, restricted stock awards, and restricted stock units. The Company typically makes grants to its officers, directors, and management in July. The grants approved by the Board of Directors (the Board) were as follows:

In thousands, except per share amounts	For the nine months ended			
	February 28, 2009		February 29, 2008	
	Shares granted	Weighted- average fair value per share	Shares granted	Weighted- average fair value per share
Stock options	783	\$ 6.90	714	\$10.83
Restricted stock	137	\$31.86	134	\$43.91
Restricted stock units	607	\$28.30	499	\$40.60

The Company accounts for all stock-based awards to employees, including grants of employee stock options, as compensation costs in the Consolidated Financial Statements based on the fair value measured as of the date of grant. These costs are recognized as an expense in the Consolidated Statements of Income over the requisite service period and increase additional paid-in capital. Stock-based compensation costs recognized were \$5.4 million and \$19.3 million for the three and nine months ended February 28, 2009, as compared with \$6.1 million and \$19.0 million for the respective prior year periods. As of February 28, 2009, the total unrecognized compensation cost related to all unvested stock-based awards was \$66.9 million and is expected to be recognized over a weighted-average period of 2.5 years.

Table of Contents**Note A: Description of Business and Significant Accounting Policies - continued**

The fair value of restricted stock awards is equal to the closing market price of the underlying common stock as of the date of grant. The fair value of restricted stock units is equal to the closing market price of the underlying common stock as of the date of grant, adjusted for the present value of expected dividends over the vesting period, as these awards do not earn dividend equivalents.

The fair value of stock option grants is estimated as of the date of grant using a Black-Scholes option pricing model. The weighted-average assumptions used for valuation under the Black-Scholes model were as follows:

	For the nine months ended	
	February	February
	28,	29,
	2009	2008
Risk-free interest rate	3.3%	4.7%
Dividend yield	3.4%	2.8%
Volatility factor	.28	.26
Expected option life in years	6.4	6.2

Risk-free interest rates are yields for zero-coupon U.S. Treasury notes maturing approximately at the end of the expected option life. The estimated volatility factor is based on a combination of historical volatility using weekly stock prices and implied market volatility, both over a period equal to the expected option life. The expected option life is based on historical exercise behavior.

The Company has determined that the Black-Scholes option pricing model, as well as the underlying assumptions used in its application, is appropriate in estimating the fair value of its stock option grants. The Company periodically assesses its assumptions as well as its choice of valuation model, and will reconsider use of this model if additional information becomes available in the future indicating that another model would provide a more accurate estimate of fair value, or if characteristics of future grants would warrant such a change.

Fair value of financial instruments: Effective June 1, 2008, the Company adopted Financial Accounting Standards Board Statement of Financial Accounting Standard (SFAS) No. 157, Fair Value Measurements. This statement clarifies the definition of fair value, establishes a framework for measuring fair value, and expands the disclosures on fair value measurements; however, this standard does not require any new fair value measurements. The adoption of this standard has not had a material effect on the Company's results of operations or financial position.

In determining the fair value of its assets and liabilities, the Company uses various valuation approaches, predominately the market and income approaches. In determining the fair value of its available-for-sale securities, the Company utilizes the Interactive Data Pricing service, a market approach. SFAS No. 157 establishes a hierarchy for information and valuations used in measuring fair value that is broken down into three levels based on reliability. Level 1 valuations are based on quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. Level 2 valuations are based on inputs, other than quoted prices included within Level 1, that are observable, either directly or indirectly. Level 3 valuations are based on information that is unobservable and significant to the overall fair value measurement.

Table of Contents**Note A: Description of Business and Significant Accounting Policies - continued**

The following table presents information on the Company's financial assets and liabilities measured at fair value on a recurring basis under SFAS No. 157 as of February 28, 2009:

In thousands	Carrying value (Fair value)	Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets:				
Available-for-sale securities	\$ 2,096,772	\$ 53	\$ 2,096,719	\$
Other securities	\$ 5,133	\$ 5,133	\$	\$
Liabilities:				
Other long-term liabilities	\$ 5,153	\$ 5,153	\$	\$

As of February 28, 2009, the Company did not have any assets or liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3).

Note B: Reclassification Within Consolidated Statements of Cash Flows

Client fund obligations represent the Company's contractual obligation to remit funds to satisfy clients' payroll and tax payment obligations. To better reflect the nature of these activities, the Company has reclassified the net change in client fund obligations in the Consolidated Statements of Cash Flows from investing activities to financing activities for all periods presented. The impact of the reclassification to the prior year period is as follows:

In thousands	For the nine months ended February 29, 2008
Net cash provided by investing activities as previously reported	\$ 760,088
Impact of reclassification net change in client fund obligations	(411,417)
Net cash provided by investing activities as reclassified	\$ 348,671
Net cash used in financing activities as previously reported	\$ (1,270,026)
Impact of reclassification net change in client fund obligations	411,417
Net cash used in financing activities as reclassified	\$ (858,609)

This reclassification had no impact on the net change in cash and cash equivalents or cash flows from operating activities for the period presented.

Table of Contents**Note C: Basic and Diluted Earnings Per Share**

Basic and diluted earnings per share were calculated as follows:

	For the three months ended		For the nine months ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
In thousands, except per share amounts				
Basic earnings per share:				
Net income	\$ 130,790	\$ 142,474	\$ 419,741	\$ 440,661
Weighted-average common shares outstanding	360,821	361,178	360,743	370,814
Basic earnings per share	\$ 0.36	\$ 0.39	\$ 1.16	\$ 1.19
Diluted earnings per share:				
Net income	\$ 130,790	\$ 142,474	\$ 419,741	\$ 440,661
Weighted-average common shares outstanding	360,821	361,178	360,743	370,814
Dilutive effect of common share equivalents at average market price	92	592	223	1,266
Weighted-average common shares outstanding, assuming dilution	360,913	361,770	360,966	372,080
Diluted earnings per share	\$ 0.36	\$ 0.39	\$ 1.16	\$ 1.18
Weighted-average anti-dilutive common share equivalents	14,379	7,757	13,267	6,061

Weighted-average common share equivalents that have an anti-dilutive impact are excluded from the computation of diluted earnings per share.

Shares of the Company's common stock issued for stock option exercises and vesting of restricted stock and restricted stock units for the three months ended February 28, 2009 were minimal, while 0.3 million shares were issued for the nine months ended February 28, 2009. Total shares issued during the three and nine months ended February 29, 2008 were 0.1 million shares and 1.9 million shares, respectively.

Table of Contents**Note D: Funds Held for Clients and Corporate Investments**

Funds held for clients and corporate investments consisted of the following:

Other equity securities	20	59		79
Total available-for-sale securities	3,328,771	25,880	(1,107)	3,353,544
Other	10,143	426	(410)	10,159
Total funds held for clients and corporate investments	\$4,053,821	\$26,306	\$(1,517)	\$4,078,610

Table of Contents**Note D: Funds Held for Clients and Corporate Investments - *continued***

Included in money market securities and other cash equivalents as of February 28, 2009 are U.S. agency discount notes, government money market funds, and bank demand deposit accounts. As of May 31, 2008, money market securities and other cash equivalents included government money market funds, commercial paper, time deposits, repurchase agreements, and bank demand deposit accounts.

Classification of investments on the Consolidated Balance Sheets is as follows:

In thousands	February 28, 2009	May 31, 2008
Funds held for clients	\$ 4,153,478	\$ 3,808,085
Corporate investments	61,163	228,727
Long-term corporate investments	82,221	41,798
Total funds held for clients and corporate investments	\$ 4,296,862	\$ 4,078,610

The Company is exposed to credit risk in connection with these investments through the possible inability of borrowers to meet the terms of their bonds. In addition, the Company is exposed to interest rate risk, as rate volatility will cause fluctuations in the fair value of held investments and in the earnings potential of future investments. The Company maintains a conservative investment strategy within its investment portfolios to maximize liquidity and protect principal. The Company attempts to mitigate the risks associated with its investment activities by investing primarily in high credit quality securities with AAA and AA ratings and short-term securities with A-1/P-1 ratings, limiting amounts that can be invested in any single issuer, and by investing in short- to intermediate-term instruments whose fair value is less sensitive to interest rate changes. All the investments held as of February 28, 2009 are traded in active markets.

As of February 28, 2009, the Company had no exposure to variable rate demand notes or prime money market funds. The Company's primary short-term investment option is currently U.S. agency discount notes. The Company has no exposure to auction rate securities, sub-prime mortgage securities, asset-backed securities or asset-backed commercial paper, collateralized debt obligations, enhanced cash or cash plus mutual funds, or structured investment vehicles (SIVs). The Company has not and does not utilize derivative financial instruments to manage interest rate risk.

The Company's available-for-sale securities reflected a net unrealized gain of \$66.8 million as of February 28, 2009 compared with a net unrealized gain of \$24.8 million as of May 31, 2008. The gross unrealized losses of \$0.3 million, included in the net unrealized gain, as of February 28, 2009 were comprised of 11 available-for-sale securities, which had a total fair value of \$28.9 million. The gross unrealized losses of \$1.1 million, included in the net unrealized gain, as of May 31, 2008 were comprised of 76 available-for-sale securities, which had a total fair value of \$243.6 million.

Table of Contents**Note D: Funds Held for Clients and Corporate Investments - *continued***

The Company regularly reviews its investment portfolios to determine if any investment is other-than-temporarily impaired due to changes in credit risk or other potential valuation concerns. The Company believes that the investments it held as of February 28, 2009 were not other-than-temporarily impaired. While certain available-for-sale securities had fair values that were below cost, the Company believes that it is probable that the principal and interest will be collected in accordance with contractual terms, and that the decline in the fair value was due to changes in interest rates and was not due to increased credit risk. As of February 28, 2009 and May 31, 2008, the majority of the securities with an unrealized loss held an AA rating or better. The Company currently believes that it has the ability and intent to hold these investments until the earlier of market price recovery or maturity. The Company's assessment that an investment is not other-than-temporarily impaired could change in the future due to new developments or changes in the Company's strategies or assumptions related to any particular investment.

The cost and fair value of available-for-sale securities that had stated maturities as of February 28, 2009 are shown below by contractual maturity. Expected maturities can differ from contractual maturities because borrowers may have the right to prepay obligations without prepayment penalties.

In thousands	February 28, 2009	
	Cost	Fair value
Maturity date:		
Due in one year or less	\$ 598,844	\$ 602,786
Due after one year through three years	638,333	660,656
Due after three years through five years	526,828	553,636
Due after five years	265,996	279,641
Total	\$ 2,030,001	\$ 2,096,719

Note E: Property and Equipment, Net of Accumulated Depreciation

The components of property and equipment, at cost, consisted of the following:

In thousands	February 28, 2009	May 31, 2008
Land and improvements	\$ 4,144	\$ 3,617
Buildings and improvements	84,636	84,723
Data processing equipment	178,654	166,893
Software	106,381	98,513
Furniture, fixtures, and equipment	142,831	136,330
Leasehold improvements	86,660	76,244
Construction in progress	61,500	52,078
Total property and equipment, gross	664,806	618,398
Less: Accumulated depreciation and amortization	383,850	343,101
Property and equipment, net of accumulated depreciation	\$ 280,956	\$ 275,297

Table of Contents**Note E: Property and Equipment, Net of Accumulated Depreciation - continued**

Depreciation expense was \$15.8 million and \$47.3 million for the three and nine months ended February 28, 2009, respectively, as compared with \$15.4 million and \$45.5 million for the three and nine months ended February 29, 2008, respectively.

Within construction in progress, there were costs for software being developed for internal use of \$60.4 million and \$51.6 million as of February 28, 2009 and May 31, 2008, respectively. Capitalization of costs ceases when the software is ready for its intended use, at which time the Company begins amortization of the costs. The Company has approximately \$57.6 million in costs for internal use software that will begin to amortize during the last three months of fiscal 2009. The estimated annual amortization related to these costs will be approximately \$3.8 million.

Note F: Goodwill and Intangible Assets, Net of Accumulated Amortization

The Company had goodwill balances on its Consolidated Balance Sheets of \$434.1 million as of February 28, 2009, and \$433.3 million as of May 31, 2008. During the nine months ended February 28, 2009, the Company recorded \$0.8 million of goodwill related to acquisitions of businesses.

The Company has certain intangible assets with finite lives. The components of intangible assets, at cost, consisted of the following:

In thousands	February 28, 2009	May 31, 2008
Client lists and associate office license agreements	\$197,675	\$170,984
Other intangible assets	5,675	5,675
Total intangible assets, gross	203,350	176,659
Less: Accumulated amortization	118,078	102,159
Intangible assets, net of accumulated amortization	\$ 85,272	\$ 74,500

Amortization expense relating to intangible assets was \$5.7 million and \$15.9 million for the three and nine months ended February 28, 2009, respectively, as compared with \$5.1 million and \$13.8 million for the three and nine months ended February 29, 2008, respectively.

The estimated amortization expense relating to intangible asset balances for the full fiscal year 2009 and the following four fiscal years, as of February 28, 2009, is as follows:

In thousands	Estimated amortization expense
Fiscal year ending May 31,	
2009	\$21,967
2010	\$21,703
2011	\$18,625
2012	\$15,799
2013	\$ 9,852

Table of Contents**Note G: Business Acquisition Reserves**

The Company has recorded reserves related to acquisitions in the amounts of \$10.2 million for severance and \$6.4 million for redundant lease costs. Activity for the nine months ended February 28, 2009 for these reserves is summarized as follows:

In thousands	Balance as	Utilization	Additions	Balance as
	of			of
	May 31,	reserve	to	February
	2008		reserve	28,
				2009
Severance costs	\$149	\$	\$207	\$ 356
Redundant lease costs	\$742	\$(200)	\$517	\$1,059

The remaining severance payments are expected to be completed during the fiscal year ending May 31, 2010. Redundant lease payments are expected to be completed during the fiscal year ending May 31, 2016. Payments of \$0.7 million extend beyond one year and are included in other long-term liabilities on the Consolidated Balance Sheets as of February 28, 2009.

Note H: Income Taxes

The Company is currently under a state income tax audit for the years ended May 31, 2004 through 2007. The examination phase of the audit may conclude within the next twelve months; however, based on the current status of the examination, it is not reasonably possible to estimate the impact, if any, to previously recorded uncertain tax positions. As of February 28, 2009 and May 31, 2008, the total reserve for uncertain tax positions was \$23.0 million and \$17.7 million, respectively.

Note I: Comprehensive Income

Comprehensive income is comprised of two components: net income and other comprehensive income. Comprehensive income includes all changes in equity during a period except those resulting from transactions with owners of the Company. The change in unrealized gains and losses, net of applicable taxes, related to available-for-sale securities is the primary component reported in accumulated other comprehensive income in the Consolidated Balance Sheets.

Comprehensive income, net of related tax effects, is as follows:

In thousands	For the three months		For the nine months ended	
	February	February	February	February
	28,	29,	28,	29,
	2009	2008	2009	2008
Net income	\$130,790	\$142,474	\$419,741	\$440,661
Change in unrealized gains and losses of available-for-sale securities, net of taxes	22,130	(234)	27,078	18,432
Total comprehensive income	\$152,920	\$142,240	\$446,819	\$459,093

As of February 28, 2009, accumulated other comprehensive income was \$43.1 million, which was net of taxes of \$23.7 million. As of May 31, 2008, accumulated other comprehensive income was \$16.0 million, which was net of taxes of \$8.8 million.

Table of Contents**Note J: Commitments and Contingencies**

Lines of credit: As of February 28, 2009, the Company had unused borrowing capacity available under four uncommitted, secured, short-term lines of credit at market rates of interest with financial institutions as follows:

Financial institution	Amount available	Expiration date
JP Morgan Chase Bank, N.A.	\$350 million	February 2010
Bank of America, N.A.	\$250 million	February 2010
PNC Bank, National Association	\$150 million	February 2010
Wells Fargo Bank, National Association	\$150 million	February 2010

The primary uses of the lines of credit would be to meet short-term funding requirements related to deposit account overdrafts and client fund obligations arising from electronic payment transactions on behalf of clients in the ordinary course of business, if necessary. No amounts were outstanding against these lines of credit as of, or during, the nine months ended February 28, 2009.

Credit facility: The Company has a committed, secured, one-year revolving credit facility, expiring on September 20, 2009. Paychex of New York LLC (the Borrower), a subsidiary of the Company, entered into the credit facility with JPMorgan Chase Bank, N.A. and Bank of America, N.A. (the Lenders). The credit facility is collateralized by the long-term securities of the Borrower, to the extent of any borrowing. Under the credit facility the Borrower may, subject to certain restrictions, borrow up to \$400 million to meet short-term funding requirements on client fund obligations. The obligations under this credit facility have been guaranteed by the Company and certain of its subsidiaries. Upon expiration of the commitment in September 2009, any borrowings outstanding will mature and be payable on such date. No amounts were outstanding against this credit facility as of, or during, the nine months ended February 28, 2009.

The revolving loans under the credit facility will bear interest at competitive rates to be elected by the Borrower. The Borrower will also pay a facility fee at a rate of .05% per annum on the average daily unused amount of the commitment.

The credit facility includes various financial and other customary covenants, with which the Borrower must comply in order to maintain borrowing availability and avoid penalties, including a limitation on the Borrower's ability to incur additional indebtedness, create liens, enter into consolidations or mergers, dispose of assets, make investments, pay dividends, enter into transactions with affiliates, or prepay certain indebtedness. The credit facility (and collateral security agreements executed in connection therewith) also contains customary events of default including, but not limited to, payment defaults, covenant defaults, cross-defaults to other indebtedness, material judgment defaults, inaccuracy of representations and warranties, bankruptcy and insolvency events, defects in the Lenders' security interest, change in control events, and material adverse changes.

Certain Lenders under the credit facility, and their respective affiliates, have performed, and may in the future perform for the Company and its subsidiaries, various commercial banking, investment banking, underwriting, and other financial advisory services, for which they have received, and will receive, customary fees and expenses.

Table of Contents**Note J: Commitments and Contingencies - *continued***

Letters of credit: As of February 28, 2009, and May 31, 2008, the Company also had irrevocable standby letters of credit available totaling \$65.8 million and \$71.5 million, respectively, required to secure commitments for certain insurance policies and bonding requirements. These letters of credit expire at various dates between May 2009 and December 2012 and are collateralized by securities held in the Company's investment portfolio. No amounts were outstanding on these letters of credit as of, or during, the nine months ended February 28, 2009.

Other commitments: The Company enters into various purchase commitments with vendors in the ordinary course of business. As of February 28, 2009, the Company had outstanding commitments to purchase approximately \$4.2 million of capital assets.

The Company guarantees performance of service on annual maintenance contracts for clients who financed their service contracts through a third party. In the normal course of business, the Company makes representations and warranties that guarantee the performance of its services under service arrangements with clients. In addition, the Company has entered into indemnification agreements with its officers and directors, which require it to defend and, if necessary, indemnify these individuals for certain pending or future claims as they relate to their services provided to the Company. Historically, there have been no material losses related to such guarantees and indemnifications. The Company currently self-insures the deductible portion of various insured exposures under certain employee benefit plans. The Company's estimated loss exposure under these insurance arrangements is recorded in other current liabilities on the Consolidated Balance Sheets. Historically, the amounts accrued have not been material. The Company also maintains insurance coverage in addition to its purchased primary insurance policies for gap coverage for employment practices liability, errors and omissions, warranty liability, and acts of terrorism; and capacity for deductibles and self-insured retentions through its captive insurance company.

Contingencies: The Company is subject to various claims and legal matters that arise in the normal course of its business. These include disputes or potential disputes related to breach of contract, breach of fiduciary duty, employment-related claims, tax claims, and other matters.

In August 2001, the Company's wholly owned subsidiary, Rapid Payroll, Inc. (Rapid Payroll) informed 76 licensees that it intended to stop supporting their payroll processing software in August of 2002. Thereafter, lawsuits were commenced by licensees asserting various claims, including breach of contract and related tort and fraud causes of action. As previously reported in the Company's prior periodic reports, these lawsuits sought compensatory damages, punitive damages, and injunctive relief against Rapid Payroll, the Company, the Company's former Chief Executive Officer, and its Senior Vice President of Sales and Marketing. In accordance with the Company's indemnification agreements with its senior executives, the Company has agreed to defend and, if necessary, indemnify them in connection with these pending matters.

As of February 28, 2009, the Company has fully resolved its licensing responsibility and settled all litigation with 75 of the 76 licensees who were provided services by Rapid Payroll. In 2007, a verdict was issued in the *Brunskill Associates, Inc. v. Rapid Payroll, Inc. et al.* case, which was pending in California Superior Court, Los Angeles County, in which a jury awarded to the plaintiff \$15.0 million in compensatory damages and subsequently awarded an additional \$11.0 million in punitive damages. The Company is pursuing an appeal of that verdict. Any final judgment would be subject to an award of statutory interest.

Table of Contents**Note J: Commitments and Contingencies - *continued***

The Company has a reserve for pending litigation matters. The litigation reserve has been adjusted in fiscal 2009 for settlements and incurred litigation expenditures. The Company's reserve for all pending litigation totaled \$20.4 million as of February 28, 2009, and is included in current liabilities on the Consolidated Balance Sheets.

In light of the reserve for all pending litigation matters, the Company's management currently believes that resolution of outstanding legal matters will not have a material adverse effect on the Company's financial position or results of operations. However, legal matters are subject to inherent uncertainties and there exists the possibility that the ultimate resolution of these matters could have a material adverse impact on the Company's financial position and the results of operations in the period in which any such effect is recorded.

Note K: Supplemental Cash Flow Information

Income taxes paid were \$188.7 million and \$169.0 million for the nine months ended February 28, 2009 and February 29, 2008, respectively.

Note L: Related Party Transactions

During the three and nine months ended February 28, 2009, the Company purchased approximately \$1.4 million and \$4.0 million of data processing equipment and software from EMC Corporation, as compared with \$1.5 million and \$4.1 million in the respective prior year periods. The Chairman, President, and Chief Executive Officer of EMC Corporation is a member of the Company's Board.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Management's Discussion and Analysis of Financial Condition and Results of Operations reviews the operating results of Paychex, Inc. and its wholly owned subsidiaries (we, our, or us) for the three months ended February 28, 2009 (the third quarter), the nine months ended February 28, 2009 (the first nine months or the nine-month period), and the respective prior year periods ended February 29, 2008, and our financial condition as of February 28, 2009. The focus of this review is on the underlying business reasons for significant changes and trends affecting our revenue, expenses, net income, and financial condition. This review should be read in conjunction with the February 28, 2009 Consolidated Financial Statements and the related Notes to Consolidated Financial Statements contained in this Quarterly Report on Form 10-Q (Form 10-Q). This review should also be read in conjunction with our Annual Report on Form 10-K (Form 10-K) for the year ended May 31, 2008 (fiscal 2008). Forward-looking statements in this review are qualified by the cautionary statement included in this review under the next sub-heading, Safe-Harbor Statement under the Private Securities Litigation Reform Act of 1995.

Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995: Certain written and oral statements made by management may constitute forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995 (the Reform Act). Forward-looking statements are identified by such words and phrases as we expect, expected to, estimates, estimated, current outlook, we look forward to, would equate to, projects, projections, projected to be, anticipates, anticipated, we believe, could be, and other similar phrases. Forward-looking statements addressing operating performance, events, or developments that we expect or anticipate will occur in the future, including statements relating to revenue growth, earnings, earnings-per-share growth, or similar projections, are forward-

Table of Contents

looking statements within the meaning of the Reform Act. Because they are forward-looking, they should be evaluated in light of important risk factors. These risk factors include, but are not limited to, the following risks, as well as those that are described in our periodic filings with the Securities and Exchange Commission (SEC):

general market and economic conditions including, among others, changes in United States (U.S.) employment and wage levels, changes in new hiring trends, changes in short- and long-term interest rates, changes in the fair value and the credit rating of securities held by us, and accessibility of financing;

changes in demand for our services and products, ability to develop and market new services and products effectively, pricing changes and the impact of competition, and the availability of skilled workers;

changes in the laws regulating collection and payment of payroll taxes, professional employer organizations, and employee benefits, including retirement plans, workers compensation, health insurance, state unemployment, and section 125 plans;

changes in workers compensation rates and underlying claims trends;

the possibility of failure to keep pace with technological changes and provide timely enhancements to services and products;

the possibility of failure of our operating facilities, computer systems, and communication systems during a catastrophic event;

the possibility of third-party service providers failing to perform their functions;

the possibility of penalties and losses resulting from errors and omissions in performing services;

the possible inability of our clients to meet their payroll obligations;

the possible failure of internal controls or our inability to implement business processing improvements; and

potentially unfavorable outcomes related to pending legal matters.

Any of these factors could cause our actual results to differ materially from our anticipated results. The information provided in this Form 10-Q is based upon the facts and circumstances known at this time. We undertake no obligation to update these forward-looking statements after the date of filing of this Form 10-Q with the SEC to reflect events or circumstances after such date, or to reflect the occurrence of unanticipated events.

Overview

We are a leading provider of comprehensive payroll and integrated human resource and employee benefits outsourcing solutions for small- to medium-sized businesses. Our Payroll and Human Resource Services offer a portfolio of services and products that allow our clients to meet their diverse payroll and human resource needs. Our Payroll services are provided through either our Core Payroll or Major Market Services, which is utilized by clients that have more sophisticated payroll and benefit needs, and include:

payroll processing;

payroll tax administration services;

employee payment services; and

regulatory compliance services (new-hire reporting and garnishment processing).

Table of Contents

Our Human Resource Services primarily include:

comprehensive human resource outsourcing services, which include Paychex Premier® Human Resources and our Professional Employer Organization (PEO);

retirement services administration;

workers compensation insurance services;

health and benefits services;

time and attendance solutions; and

other human resource services and products.

We primarily earn revenue through recurring fees for services performed. Service revenue is primarily driven by the number of clients, checks or transactions per client per pay period, and utilization of ancillary services. We also earn interest on funds held for clients between the time of collection from our clients and remittance to the applicable tax or regulatory agencies or client employees. Our strategy is focused on achieving strong long-term financial performance by providing high quality, timely, accurate, and affordable services; growing our client base; increasing utilization of our ancillary services; leveraging our technological and operating infrastructure; and expanding our service offerings. Our financial results continue to be challenged by weakening economic conditions as many of our key indicators were weaker during our third quarter than on a year-to-date basis as compared to the respective prior year periods. Checks per client decreased 4.3% for the third quarter compared to a decrease of 2.4% for the nine-month period. Our new client sales from new business starts declined 23% for the third quarter compared to a 16% decline for the nine-month period. Clients lost due to companies going out of business or no longer having any employees increased 21% for the third quarter compared to a 16% increase for the nine-month period. On a positive note, while deterioration in the above trends was noticeable through January 2009, the trends appear to have stabilized as we review our results for February and early March 2009. Considering the weak economy, our calendar year end selling season was good as the annualized revenue sold in the third quarter was down only 4% for the third quarter and was flat for the nine-month period when compared to the respective prior year periods.

In summary, the weak economy affects our ability to sell and retain clients and reduces our transaction volumes related to fewer employees in our client base. The volatility in the financial markets has resulted in lower investment rates of return and lower average invested balances in our funds held for clients, and has adversely impacted the asset value of our retirement services client employees funds.

The financial results for the third quarter as compared to the same period last year are as follows:

Payroll service revenue increased 2% to \$381.2 million.

Human Resource Services revenue increased 9% to \$131.0 million.

Total revenue decreased 1% to \$528.6 million.

Operating income decreased 6% to \$197.4 million, as combined interest on funds held for clients and investment income decreased 57%.

Operating income, net of certain items, increased 5% to \$181.0 million. Refer to the discussion on page 20 of this review for further information on this non-GAAP measure.

Table of Contents

Net income and diluted earnings per share decreased 8% to \$130.8 million and \$0.36 per share, respectively. Despite the economic pressures, we have achieved growth in our service revenue as a result of price increases and growth in utilization of ancillary Payroll and Human Resource Services by new and existing clients. We also have continued to leverage our expenses as operating income, net of certain items, increased 5% for the third quarter compared to the same period last year, and improved as a percentage of service revenue to 35.3% from 35.0% for the respective periods.

In addition to reporting operating income, a U.S. generally accepted accounting principle (GAAP) measure, we present operating income, net of certain items, which is a non-GAAP measure. We believe operating income, net of certain items, is an appropriate additional measure, as it is an indicator of our core business operations performance period over period. It is also the measure used internally for establishing the following year s targets and measuring management s performance in connection with certain performance-based compensation payments and awards. Operating income, net of certain items, excludes interest on funds held for clients. Interest on funds held for clients is an adjustment to operating income due to the volatility of interest rates, which are not within the control of management. Operating income, net of certain items, is not calculated through the application of GAAP and is not the required form of disclosure by the SEC. As such, it should not be considered as a substitute for the GAAP measure of operating income and, therefore, should not be used in isolation, but in conjunction with the GAAP measure. The use of any non-GAAP measure may produce results that vary from the GAAP measure and may not be comparable to a similarly defined non-GAAP measure used by other companies. Operating income, net of certain items, increased 5% to \$181.0 million for the third quarter, as compared to \$173.0 million for the same period last year. Refer to the reconciliation of operating income to operating income, net of certain items, on page 26 of this review.

Our results have been impacted by not only the weak economic conditions, but also the credit crisis. That credit crisis caused a flight to quality investments in the financial markets, resulting in lower available yields on high quality instruments. The average rate of return earned on our combined investment portfolios for the third quarter was 1.7% compared to 3.6% for the same period last year. Our short-term portfolio has been heavily invested in taxable securities, and our short-term taxable interest rates earned have averaged 0.5% for the third quarter compared to 3.8% for the same period last year.

Financial Position and Liquidity

The current credit crisis has resulted in unprecedented volatility in the global financial markets, with diminished liquidity and increased exposure to investment losses occurring in these markets. Despite this macroeconomic environment, we believe that our financial position as of February 28, 2009 remained strong with cash and total corporate investments of \$571.8 million and no debt. Our cash and total corporate investments have increased more than \$100 million since May 31, 2008.

We also believe that our investments as of February 28, 2009 were not other-than-temporarily impaired, nor has any event occurred subsequent to that date to indicate any other-than-temporary impairment. We maintain a conservative investment strategy within our investment portfolios to maximize liquidity and protect principal. In the current financial markets, this translates to significantly lower yields on high quality instruments, impacting our income earned on funds held for clients and corporate investments. Our exposure from our investing activities has been limited in the current investment environment as the result of our policies of investing primarily in high credit quality securities with AAA and AA ratings and short-term securities with

Table of Contents

A-1/P-1 ratings, and by limiting the amounts that can be invested in any single issuer. All investments held as of February 28, 2009 are traded in active markets.

As of February 28, 2009, we had no exposure to variable rate demand notes (VRDNs) or prime money market funds. Our primary short-term investment option is currently U.S. agency discount notes. We have no exposure to auction rate securities, sub-prime mortgage securities, asset-backed securities or asset-backed commercial paper, collateralized debt obligations, enhanced cash or cash plus mutual funds, or structured investment vehicles (SIVs). We have not and do not utilize derivative financial instruments to manage our interest rate risk.

Our primary source of cash is from our ongoing operations. Cash flow from operations was \$563.3 million for the first nine months, as compared with \$590.4 million for the same period last year. The decrease in cash flow from operations was related to lower net income and changes in operating assets and liabilities. Historically, we have funded operations, capital purchases, and dividend payments from our operating activities. It is anticipated that cash and total corporate investments as of February 28, 2009, along with projected operating cash flows, will support our normal business operations, capital purchases, and dividend payments for the foreseeable future. During the first nine months, dividends paid to stockholders were 80% of net income.

For further analysis of our results of operations for the three and nine months ended February 28, 2009, and our financial position as of February 28, 2009, refer to the analysis and discussion in the Results of Operations, Liquidity and Capital Resources, and Critical Accounting Policies sections of this review.

Outlook

Our outlook for the full fiscal year ending May 31, 2009 (fiscal 2009) has been revised to reflect the impacts of current economic and financial conditions, and assumes the economic weakness we have experienced will continue through the remainder of the fiscal year. Refer to page 19 for information on some of our key indicators, which provides statistical evidence of the economic weakness in the third quarter and first nine months of fiscal 2009.

Projected revenue and net income growth for fiscal 2009 are as follows:

Payroll service revenue	1%	3%
Human Resource Services revenue	10%	13%
Total service revenue	3%	5%
Interest on funds held for clients	(45%)	(40%)
Total revenue	0%	2%
Investment income, net	(75%)	(70%)
Net income	(7%)	(5%)

Growth in operating income, net of certain items, is expected to approximate 5% to 8% for fiscal 2009. The effective income tax rate is expected to approximate 34% throughout fiscal 2009. Under normal financial market conditions, the impact to our earnings from a 25-basis-point increase or decrease in the short-term interest rates would be approximately \$4.0 million, after taxes, for a twelve-month period. Such a basis point change may or may not be tied to changes in the Federal Funds rate. We estimate the lowest level of combined interest on funds held for clients and investment income over the next twelve-month period would be approximately \$60 million.

Table of Contents

Purchases of property and equipment for fiscal 2009 are expected to be in the range of \$75 million to \$80 million, in line with our growth rates. Fiscal 2009 depreciation expense is projected to be approximately \$65 million, and we project amortization of intangible assets to be approximately \$20 million.

RESULTS OF OPERATIONS*Summary of Results of Operations:*

As of:	February 28, 2009	May 31, 2008
\$ in millions		
Net unrealized gain on available-for-sale securities ⁽¹⁾	\$ 66.8	\$ 24.8
Federal Funds rate ⁽²⁾	0.25%	2.00%
Three-year AAA municipal securities yield	1.48%	2.65%
Total fair value of available-for-sale securities	\$2,096.8	\$3,353.5
Average duration of available-for-sale securities in years ⁽³⁾	2.3	2.7
Weighted-average yield-to-maturity of available-for-sale securities ⁽³⁾	3.3%	3.4%

(1) The net unrealized gain of our investment

portfolio was approximately \$65.5 million as of March 20, 2009.

- (2) The Federal Funds rate was a range of 0% to 0.25% as of February 28, 2009.
- (3) These items exclude the impact of VRDNs held as of May 31, 2008, as they are tied to short-term interest rates.

Table of Contents

Payroll service revenue: The increases in Payroll service revenue of 2% and 4%, respectively, for the third quarter and first nine months of fiscal 2009 from the same periods last year were primarily attributable to price increases and growth in the utilization of our ancillary payroll services. The rate of growth has been adversely impacted by the effects of the weakening economic conditions. During the third quarter and nine-month period of fiscal 2009, checks per client declined 4.3% and 2.4%, respectively.

Our payroll tax administration services were utilized by 93% of our clients as of February 28, 2009 and February 29, 2008. Our employee payment services were utilized by 74% of all clients as of February 28, 2009, compared with 72% as of February 29, 2008. Nearly all new clients purchase our payroll tax administration services and more than 80% of new clients select a form of employee payment services.

Human Resource Services revenue: Human Resource Services revenue increased 9% to \$131.0 million and 12% to \$390.7 million for the third quarter and first nine months of fiscal 2009, respectively. The following factors contributed to Human Resource Services revenue growth:

As of: \$ in millions	February 28, 2009	% Change	February 29, 2008	% Change from February 28, 2007
Comprehensive human resource outsourcing services client employees served	432,000	6%	409,000	17%
Workers compensation insurance clients	75,000	8%	70,000	19%
Retirement services clients	50,000	6%	47,000	10%
Health and benefits services revenue	\$ 14.6	79%	\$ 8.2	97%

While the above factors positively contributed to the revenue growth as compared to the same period last year, the rate of growth has been adversely impacted by economic factors. The volatility in the financial markets has caused the asset value of retirement services client employees funds to decline 23% to \$7.2 billion as of February 28, 2009 as compared to February 29, 2008. The S&P 500 declined 45% during the same period. The decline in asset value and clients employees moving their retirement portfolios to safer investments reduced retirement services revenue growth by \$3.0 million and \$5.9 million, respectively, during the third quarter and nine-month period. Within our comprehensive human resource outsourcing services we are experiencing lower levels of employees per client, which has reduced revenue growth by \$2.9 million and \$4.5 million, respectively, for the third quarter and nine-month period. The estimated growth in Human Resource Services revenue for the third quarter and nine-month period would have been 14% and 15%, respectively, exclusive of these two items. We also continue to experience volatility in PEO net service revenue due to fluctuations in workers compensation claims and adjustments to workers compensation rates in Florida.

Total service revenue: Total service revenue growth for the third quarter and first nine months of fiscal 2009 was 4% and 6%, respectively. The weak economy continues to have a negative impact on service revenue growth as, for the nine-month period, we have experienced a 16% increase in clients lost due to companies going out of business or no longer having any employees, a 16% decline in new sales from new business starts, and a 2.4% decrease in checks per client.

Table of Contents

Interest on funds held for clients: For the third quarter and first nine months of fiscal 2009, interest on funds held for clients decreased 56% and 40%, respectively. The decreases in interest on funds held for clients were primarily the result of lower average interest rates earned. In addition, the overall economic trends of companies going out of business and lower checks per client have adversely impacted the growth in average investment balances for the third quarter and nine-month period.

Combined operating and SG&A expenses: The following table summarizes total combined operating and selling, general and administrative (SG&A) expenses:

\$ in millions	For the three months ended			For the nine months ended		
	February 28, 2009	February 29, 2008	% Change	February 28, 2009	February 29, 2008	% Change
Compensation-related expenses	\$ 220.5	\$ 213.6	3%	\$ 625.3	\$ 595.7	5%
Stock-based compensation costs	5.4	6.1	(12%)	19.3	19.0	2%
Facilities expense	15.0	14.4	4%	44.5	41.9	6%
Depreciation of property and equipment	15.8	15.4	2%	47.3	45.5	4%
Amortization of intangible assets	5.7	5.1	13%	15.9	13.8	15%
Other expenses	68.8	67.2	3%	203.6	200.7	2%
Total operating and SG&A expenses	\$ 331.2	\$ 321.8	3%	\$ 955.9	\$ 916.6	4%

Combined operating and SG&A expenses increased 3% and 4% for the third quarter and first nine months of fiscal 2009 as compared with the same periods last year, primarily as a result of increases in personnel and other costs related to selling and retaining clients, and promoting new services. As of February 28, 2009, we had approximately 12,600 employees compared with approximately 12,300 employees as of February 29, 2008. The lower growth rates in compensation-related expenses are a result of lower bonus and commission expenses attributed to the more challenging selling environment given the current economic conditions. The decrease in stock-based compensation costs during the third quarter is a result of timing of vesting for certain stock-based awards.

Depreciation expense is primarily related to buildings, furniture and fixtures, data processing equipment, and software. Amortization of intangible assets is primarily related to client list acquisitions, which are amortized using either straight-line or accelerated methods. The increase in amortization was mainly due to intangibles from acquisitions and client list acquisitions. Other expenses include such items as delivery, forms and supplies, communications, travel and entertainment, professional services, and other costs incurred to support our business.

Operating income: Operating income declined 6% for the third quarter, and was flat for the first nine months of fiscal 2009, as compared with the same periods last year. The changes in operating income were attributable to the factors previously discussed.

Table of Contents

Operating income, net of certain items, excludes interest on funds held for clients. Refer to the discussion of operating income, net of certain items, in the Overview section on page 20 of this review. Operating income, net of certain items, is summarized as follows:

	For the three months ended			For the nine months ended		
	February 28, 2009	February 29, 2008	% Change	February 28, 2009	February 29, 2008	% Change
\$ in millions						
Operating income	\$ 197.4	\$ 210.4	(6%)	\$ 630.9	\$ 630.5	
Excluding: Interest on funds held for clients	(16.4)	(37.4)	(56%)	(60.4)	(100.4)	(40%)
Operating income, net of certain items	\$ 181.0	\$ 173.0	5%	\$ 570.5	\$ 530.1	8%

Investment income, net: Investment income, net primarily represents earnings from our cash and cash equivalents and investments in available-for-sale securities. Investment income does not include interest on funds held for clients, which is included in total revenue. The decrease in investment income for the third quarter as compared to the same period last year was primarily due to lower average interest rates earned, offset by higher average investment balances. The decrease for the nine-month period was a result of lower average interest rates earned and lower average investment balances, which resulted from the funding of the stock repurchase program completed in December 2007.

Income taxes: Our effective income tax rate was 34.1% for both the third quarter and first nine months of fiscal 2009, compared with 33.4% and 32.6% for the respective prior year periods. The increase in the effective income tax rate is a result of lower levels of tax-exempt income derived from municipal debt securities held in our investment portfolios.

Net income and earnings per share: The decreases in net income were 8% and 5% for the third quarter and first nine months of fiscal 2009, respectively, as compared with the same periods last year. The decreases in net income were attributable to the factors previously discussed. In particular, combined interest on funds held for clients and investment income declined 57%, or \$23.5 million, and 46%, or \$57.3 million, for the third quarter and first nine months of fiscal 2009, respectively.

Diluted earnings per share for the third quarter of \$0.36 per share decreased 8% from \$0.39 per share for the same period last year. Diluted earnings per share for the nine-month period of \$1.16 per share decreased 2% from \$1.18 per share for the same period last year. Diluted earnings per share for the nine-month period decreased at a rate lower than the decline in net income due to a lower number of weighted-average shares outstanding as a result of the stock repurchase program completed in December 2007. Additionally, the decline in combined interest on funds held for clients and investment income noted above impacted diluted earnings per share for the third quarter and first nine months of fiscal 2009 by \$0.04 per share and \$0.10 per share, respectively.

Table of Contents**LIQUIDITY AND CAPITAL RESOURCES**

The current credit crisis has resulted in unprecedented volatility in the global financial markets, with diminished liquidity and increased exposure to investment losses occurring in these markets. Despite this macroeconomic environment, we believe that our financial position as of February 28, 2009 remained strong with cash and total corporate investments of \$571.8 million and no debt. We also believe that our investments as of February 28, 2009 were not other-than-temporarily impaired, nor has any event occurred subsequent to that date to indicate an other-than-temporary impairment. Cash and total corporate investments as of February 28, 2009, along with projected operating cash flows, are expected to support our normal business operations, capital purchases, and dividend payments for the foreseeable future.

Lines of credit: As of February 28, 2009 we had unused borrowing capacity available under four uncommitted, secured, short-term lines of credit at market rates of interest with financial institutions as follows:

Financial institution	Amount available	Expiration date
JP Morgan Chase Bank, N.A.	\$350 million	February 2010
Bank of America, N.A.	\$250 million	February 2010
PNC Bank, National Association	\$150 million	February 2010
Wells Fargo Bank, National Association	\$150 million	February 2010

The primary uses of the lines of credit would be to meet short-term funding requirements related to deposit account overdrafts and client fund obligations arising from electronic payment transactions on behalf of clients in the ordinary course of business, if necessary. No amounts were outstanding against these lines of credit as of, or during, the first nine months of fiscal 2009.

Credit facility: We have a committed, secured, one-year revolving credit facility, expiring on September 20, 2009. The credit facility is collateralized by the long-term securities of Paychex of New York LLC (the Borrower), to the extent of any borrowing. Under the credit facility the Borrower may, subject to certain restrictions, borrow up to \$400 million to meet short-term funding requirements on client fund obligations. Upon expiration of the commitment in September 2009, any borrowings outstanding will mature and be payable on such date. No amounts were outstanding against this credit facility as of, or during, the first nine months of fiscal 2009.

The revolving loans under the credit facility will bear interest at competitive rates to be elected by the Borrower. The Borrower will also pay a facility fee at a rate of .05% per annum on the average daily unused amount of the commitment. Refer to Note J of the Notes to Consolidated Financial Statements for further discussion of the credit facility.

Letters of credit: As of February 28, 2009, we had irrevocable standby letters of credit available totaling \$65.8 million, required to secure commitments for certain insurance policies and bonding requirements. These letters of credit expire at various dates between May 2009 and December 2012 and are collateralized by securities held in our investment portfolios. No amounts were outstanding on these letters of credit as of, or during, the first nine months of fiscal 2009.

Other commitments: We enter into various purchase commitments with vendors in the ordinary course of business. As of February 28, 2009, we had outstanding commitments to purchase approximately \$4.2 million of capital assets.

Table of Contents

We guarantee performance of service on annual maintenance contracts for clients who financed their service contracts through a third party. In the normal course of business, we make representations and warranties that guarantee the performance of our services under service arrangements with clients. In addition, we have entered into indemnification agreements with our officers and directors, which require us to defend and, if necessary, indemnify these individuals for certain pending or future claims as they relate to their services provided to us. Historically, there have been no material losses related to such guarantees and indemnifications.

We currently self-insure the deductible portion of various insured exposures under certain employee benefit plans. Our estimated loss exposure under these insurance arrangements is recorded in other current liabilities on our Consolidated Balance Sheets. Historically, the amounts accrued have not been material. We also maintain insurance coverage in addition to our purchased primary insurance policies for gap coverage for employment practices liability, errors and omissions, warranty liability, and acts of terrorism; and capacity for deductibles and self-insured retentions through our captive insurance company.

Off-Balance Sheet Arrangements

As part of our ongoing business, we do not participate in transactions with unconsolidated entities such as special purpose entities or structured finance entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other limited purposes. We do maintain investments as a limited partner in low-income housing projects that are not considered part of our ongoing operations. These investments are accounted for under the equity method of accounting and are less than 1% of our total assets as of February 28, 2009.

Reclassification Within Consolidated Statements of Cash Flows

Client fund obligations represent our contractual obligation to remit funds to satisfy clients' payroll and tax payment obligations. To better reflect the nature of these activities, we have reclassified the net change in client fund obligations in the Consolidated Statements of Cash Flows from investing activities to financing activities for all periods presented. This reclassification had no impact on the net change in cash and cash equivalents or cash flows from operating activities for any periods presented. Refer to Note B in the Notes to Consolidated Financial Statements for more information on this reclassification.

Operating Cash Flow Activities

In millions	For the nine months ended	
	February 28, 2009	February 29, 2008
Net income	\$ 419.7	\$ 440.7
Non-cash adjustments to net income	92.9	85.0
Cash provided by changes in operating assets and liabilities	50.7	64.7
Net cash provided by operating activities	\$ 563.3	\$ 590.4

The decrease in our operating cash flows for the first nine months of fiscal 2009 related primarily to lower net income and changes in operating assets and liabilities. The fluctuation in operating assets and liabilities between periods was primarily the result of lower interest receivable, timing of billing cycles within accounts receivable, and timing of payments for compensation, PEO payroll, income tax, and other liabilities.

Table of Contents**Investing Cash Flow Activities**

In millions	For the nine months ended	
	February 28, 2009	February 29, 2008
Net change in funds held for clients and corporate investment activities	\$ (197.2)	\$ 463.5
Purchases of property and equipment, net of proceeds from the sale of property and equipment	(53.3)	(63.9)
Acquisition of businesses, net of cash acquired	(6.5)	(32.9)
Purchases of other assets	(18.1)	(18.0)
Net cash (used in)/provided by investing activities	\$ (275.1)	\$ 348.7

Funds held for clients and corporate investments: Funds held for clients and corporate investments consist of short-term funds and available-for-sale securities. The portfolio of funds held for clients and corporate investments is detailed in Note D of the Notes to Consolidated Financial Statements.

Fluctuations in net funds held for clients and corporate investment activities primarily relate to timing of purchases, sales, or maturities of investments. The amount of funds held for clients will vary based upon the timing of collecting client funds, and the related remittance of funds to applicable tax or regulatory agencies for payroll tax administration services and to employees of clients utilizing employee payment services. During the nine months ended February 29, 2008, proceeds from sales and maturities of available-for-sale securities were not reinvested as a result of the \$1.0 billion stock repurchase program completed in December 2007. Additional discussion of interest rates and related risks is included in the *Market Risk Factors* section of this review.

Purchases of long-lived assets: To support our continued client and ancillary product growth, purchases of property and equipment were made for data processing equipment and software, and for the expansion and upgrade of various operating facilities. We purchased approximately \$1.4 million and \$4.0 million of data processing equipment and software from EMC Corporation during the third quarter and first nine months of fiscal 2009 as compared with \$1.5 million and \$4.1 million in the respective prior year periods. The Chairman, President, and Chief Executive Officer of EMC Corporation is a member of our Board of Directors (the *Board*).

Construction in progress totaled \$61.5 million as of February 28, 2009 and \$52.1 million as of May 31, 2008. Of these costs, \$60.4 million and \$51.6 million represent software being developed for internal use as of February 28, 2009 and May 31, 2008, respectively. Capitalization of costs ceases when software is ready for its intended use, at which time we will begin amortization of the costs. We expect amortization of a significant portion of the internal use software costs in construction in progress to begin during the last three months of fiscal 2009, and to be amortized over fifteen years.

During the nine months ended February 28, 2009 and February 29, 2008, we paid \$6.5 million and \$32.9 million, respectively, related to immaterial acquisitions. The purchase of other assets relates to purchases of customer lists.

Table of Contents**Financing Cash Flow Activities**

In millions, except per share amounts	For the nine months ended	
	February 28, 2009	February 29, 2008
Net change in client fund obligations	\$ 305.9	\$ 411.4
Repurchases of common stock		(1,000.0)
Dividends paid	(335.8)	(334.0)
Proceeds from and excess tax benefit related to exercise of stock options	5.8	64.0
Net cash used in financing activities	\$ (24.1)	\$ (858.6)
Cash dividends per common share	\$ 0.93	\$ 0.90

Net change in client fund obligations: The client fund obligations liability will vary based on the timing of collecting client funds and the related required remittance of funds to applicable tax or regulatory agencies for payroll tax administration services and to employees of clients utilizing employee payment services. Collections from clients are typically remitted from one to 30 days after receipt, with some items extending to 90 days.

Repurchases of common stock: We repurchased 23.7 million shares of common stock for a total of \$1.0 billion under our stock repurchase program completed in December 2007.

Dividends paid: In July 2008, our Board declared an increase of 3% in the quarterly dividend payment to \$0.31 per share from \$0.30 per share. The quarterly dividend of \$0.31 per share was paid February 16, 2009 to stockholders of record as of February 1, 2009. The payment of future dividends is dependent on our future earnings and cash flow and is subject to the discretion of our Board.

Exercise of stock options: The decrease in proceeds from and excess tax benefit related to exercise of stock options is due to a decrease in the number of shares issued for stock option exercises to 0.2 million shares during the first nine months of fiscal 2009 from 1.8 million shares during the same period last year, and a decrease in the average exercise price per share.

MARKET RISK FACTORS

Changes in interest rates and interest rate risk: Funds held for clients are primarily comprised of short-term funds and available-for-sale securities. Corporate investments are primarily comprised of available-for-sale securities. As a result of our operating and investing activities, we are exposed to changes in interest rates that may materially affect our results of operations and financial position. Changes in interest rates will impact the earnings potential of future investments and will cause fluctuations in the fair value of our longer-term available-for-sale securities. We maintain a conservative investment strategy within our investment portfolios to maximize liquidity and protect principal. We attempt to mitigate the risks associated with our investing activities by investing primarily in high credit quality securities with AAA and AA ratings and short-term securities with A-1/P-1 ratings, limiting amounts that can be invested in any single issuer, and by investing in short- to intermediate-term instruments whose fair value is less sensitive to interest rate changes. We manage the available-for-sale securities to a benchmark duration of two and one-half to three years. All investments held as of February 28, 2009 are traded in active markets.

Table of Contents

As of February 28, 2009, we had no exposure to VRDNs or prime money market funds. Our primary short-term investment option is currently U.S. agency discount notes. We have no exposure to auction rate securities, sub-prime mortgage securities, asset-backed securities or asset-backed commercial paper, collateralized debt obligations, enhanced cash or cash plus mutual funds, or structured investment vehicles (SIVs). We have not and do not utilize derivative financial instruments to manage our interest rate risk.

During the first nine months of fiscal 2009, the average interest rate earned on our combined funds held for clients and corporate investment portfolios was 2.3% compared with 3.9% for the same period last year. With the turmoil currently in the financial markets, our conservative investment strategy translates to significantly lower yields on high quality instruments. When interest rates are falling, the full impact of lower interest rates will not immediately be reflected in net income due to the interaction of short- and long-term interest rate changes. During a falling interest rate environment, the decreases in interest rates decrease earnings from our short-term investments, and over time decrease earnings from our longer-term available-for-sale securities. Earnings from the available-for-sale securities, which as of February 28, 2009 had an average duration of 2.3 years, would not reflect decreases in interest rates until the investments are sold or mature and the proceeds are reinvested at lower rates.

The cost and fair value of available-for-sale securities that had stated maturities as of February 28, 2009 are shown below by contractual maturity. Expected maturities can differ from contractual maturities because borrowers may have the right to prepay obligations without prepayment penalties.

In millions	February 28, 2009	
	Cost	Fair value
Maturity date:		
Due in one year or less	\$ 598.9	\$ 602.8
Due after one year through three years	638.3	660.7
Due after three years through five years	526.8	553.6
Due after five years	266.0	279.6
Total	\$2,030.0	\$2,096.7

Table of Contents

The following table summarizes recent changes in the Federal Funds rate:

	Fiscal year through February 28, 2009	Fiscal year ended May 31, 2008	Fiscal year ended May 31, 2007
Federal Funds rate beginning of period	2.00%	5.25%	5.00%
Rate (decrease)/increase:			
First quarter			0.25
Second quarter	(1.00)	(0.75)	
Third quarter	(0.75)	(1.50)	
Fourth quarter	NA	(1.00)	
Federal Funds rate end of period ⁽¹⁾	0.25%	2.00%	5.25%
Three-year AAA municipal securities yield end of period	1.48%	2.65%	3.71%

(1) The Federal Funds rate was a range of 0% to 0.25% as of February 28, 2009.

Calculating the future effects of changing interest rates involves many factors. These factors include, but are not limited to:

daily interest rate changes;

seasonal variations in investment balances;

actual duration of short-term and available-for-sale securities;

the proportional mix of taxable and tax-exempt investments;

changes in tax-exempt municipal rates as compared to taxable investment rates, which are not synchronized or simultaneous; and

financial market volatility and the resulting effect on benchmark and other indexing interest rates.

Subject to these factors, a 25-basis-point change generally affects our tax-exempt interest rates by approximately 17 basis points.

Our total investment portfolio (funds held for clients and corporate investments) is expected to average approximately \$3.9 billion for fiscal 2009. Our normal and anticipated allocation is approximately 55% invested in short-term and available-for-sale securities with an average duration of 35 days and 45% invested in available-for-sale securities with an average duration of two and one-half to three years.

The combined funds held for clients and corporate available-for-sale securities reflected a net unrealized gain of \$66.8 million as of February 28, 2009, compared with a net unrealized gain of \$24.8 million as of May 31, 2008.

During the first nine months of fiscal 2009, the net unrealized gain/(loss) on our investment portfolios ranged from a

net unrealized loss of \$15.2 million to a net unrealized gain of \$86.6 million. Our investment portfolios reflected a net unrealized gain of approximately \$65.5 million as of March 20, 2009.

Table of Contents

As of February 28, 2009 and May 31, 2008, we had \$2.1 billion and \$3.4 billion, respectively, invested in available-for-sale securities at fair value. The weighted-average yield-to-maturity was 3.3% and 3.4% as of February 28, 2009 and May 31, 2008, respectively. The weighted-average yield-to-maturity excludes available-for-sale securities tied to short-term interest rates, such as VRDNs. Assuming a hypothetical decrease in both short-term and longer-term interest rates of 25 basis points, the resulting potential increase in fair value for our portfolio of available-for-sale securities held as of February 28, 2009 would be in the range of \$11.5 million to \$12.0 million. Conversely, a corresponding increase in interest rates would result in a comparable decrease in fair value. This hypothetical increase or decrease in the fair value of the portfolio would be recorded as an adjustment to the portfolio's recorded value, with an offsetting amount recorded in stockholders' equity. These fluctuations in fair value would have no related or immediate impact on the results of operations, unless any declines in fair value were considered to be other-than-temporary.

Credit Risk: We are exposed to credit risk in connection with these investments through the possible inability of the borrowers to meet the terms of their bonds. We attempt to mitigate this risk by investing primarily in high credit quality securities with AAA and AA ratings and short-term securities with A-1/P-1 ratings, and by limiting amounts that can be invested in any single issuer.

We regularly review our investment portfolios to determine if any investment is other-than-temporarily impaired due to changes in credit risk or other potential valuation concerns. We believe that the investments we held as of February 28, 2009 were not other-than-temporarily impaired. While certain available-for-sale securities had fair values that were below cost, we believe that it is probable that the principal and interest will be collected in accordance with contractual terms, and that the decline in the fair value was due to changes in interest rates and was not due to increased credit risk. As of February 28, 2009 and May 31, 2008, the majority of the securities with an unrealized loss held an AA rating or better. We currently believe that we have the ability and intent to hold these investments until the earlier of market price recovery or maturity. Our assessment that an investment is not other-than-temporarily impaired could change in the future due to new developments or changes in our strategies or assumptions related to any particular investment.

CRITICAL ACCOUNTING POLICIES

Our critical accounting policies are described in Item 7 of our Form 10-K for fiscal 2008, filed with the SEC on July 18, 2008. On an ongoing basis, we evaluate the critical accounting policies used to prepare our Consolidated Financial Statements, including, but not limited to, those related to:

revenue recognition;

PEO workers' compensation insurance;

valuation of investments;

goodwill and other intangible assets;

accrual for client fund losses;

contingent liabilities;

stock-based compensation costs; and

income taxes.

Table of Contents

There have been no material changes in these aforementioned critical accounting policies, other than as required by adoption of new accounting pronouncements as described below.

Effective June 1, 2008, we adopted Financial Accounting Standards Board Statement of Financial Accounting Standard (SFAS) No. 157, Fair Value Measurements. This statement clarifies the definition of fair value, establishes a framework for measuring fair value and expands the disclosures on fair value measurements; however, this standard does not require any new fair value measurements. The adoption of this standard has not had a material effect on our results of operations or financial position.

In determining the fair value of our assets and liabilities, we use various valuation approaches, predominately the market and income approaches. In determining the fair value of our available-for-sale securities, we utilize the Interactive Data Pricing service, a market approach. SFAS No. 157 establishes a hierarchy for information and valuations used in measuring fair value that is broken down into three levels based on its reliability. Level 1 valuations are based on quoted prices in active markets for identical assets or liabilities that we have the ability to access. Level 2 valuations are based on inputs, other than quoted prices included within Level 1, that are observable, either directly or indirectly. Level 3 valuations are based on information that is unobservable and significant to the overall fair value measurement.

Item 3. Quantitative and Qualitative Disclosure of Market Risk

The information called for by this item is provided under the caption Market Risk Factors under Item 2 Management s Discussion and Analysis of Financial Condition and Results of Operations and is incorporated herein by reference.

Item 4. Controls and Procedures

Disclosure Controls and Procedures and Internal Control Over Financial Reporting: Disclosure controls and procedures are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Securities Exchange Act of 1934, as amended (the Exchange Act), such as this report, is recorded, processed, summarized and reported within the time periods specified in the SEC s rules and forms. Disclosure controls and procedures are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Evaluation of Disclosure Controls and Procedures: As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer of the effectiveness of disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act. Based on such evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that as of the end of the period covered by this report, our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting: We also carried out an evaluation of the internal control over financial reporting to determine whether any changes occurred during the period covered by this report. Based on such evaluation, there has been no change in our internal control over financial reporting that occurred during the most recently completed fiscal quarter ended February 28, 2009, that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

See Note J of the Notes to Consolidated Financial Statements, which is incorporated herein by reference thereto, for information regarding legal proceedings.

Item 1A. Risk Factors

With the exception of the following, there have been no other material changes in our risk factors from those disclosed in Part I, Item 1A, of our fiscal 2008 Form 10-K.

We may be adversely impacted by volatility in the financial and economic environment: During periods of weakening economic conditions, employment levels may decrease and interest rates may become more volatile. These conditions may impact our business due to lower transaction volumes or an increase in the number of clients going out of business. Current or potential clients may decide to reduce their spending on payroll and other outsourcing services. The interest we earn on funds held for clients may decrease as a result of a decline in funds available to invest and lower interest rates. In addition, during periods of volatility in the credit markets, certain types of investments may not be available to us or may become too risky for us to invest in, further reducing the interest we may earn on client funds. Constriction in the credit markets may impact the availability of financing, even to borrowers with the highest credit ratings. We historically have not borrowed against available credit arrangements to meet liquidity needs. However, should we require additional short-term liquidity during days of large outflows of client funds, a credit constriction may limit our ability to access those funds or the flexibility to obtain them at interest rates that would be acceptable to us. If all of these financial and economic circumstances were to remain in effect for an extended period of time, there could be a material adverse effect on our financial results.

Item 6. Exhibits

Exhibit 31.1: Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

Exhibit 31.2: Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

Exhibit 32.1: Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

Exhibit 32.2: Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
